Historical language advisory

Certain parts of the Library and Archives Canada (LAC) collection contain historical language and content that some may consider offensive, for example, language used to refer to racial, ethnic and cultural groups. Items in the collection, their content and their descriptions reflect the time period when they were created and the view of their creator. The items retain their original descriptions to ensure that attitudes and viewpoints are not erased from the historical record. LAC provides additional descriptive information to give background on the records. This is an ongoing process. For more information, please visit LAC's [Historical language advisory](#) page.

Mise en garde – terminologie historique

Certaines parties de la collection de Bibliothèque et Archives Canada (BAC) renferment de la terminologie et des contenus à caractère historique que certains pourraient considérer comme offensants, notamment au chapitre du langage utilisé pour désigner des groupes raciaux, ethniques et culturels. Les éléments qui composent la collection, leurs contenus et leurs descriptions sont le reflet des époques au cours desquelles ils ont été créés et des points de vue de leurs créateurs. Les descriptions d'origine sont conservées afin que ces attitudes et perspectives ne soient pas supprimées des sources historiques. BAC fournit toutefois des renseignements descriptifs supplémentaires dans le but de donner davantage de contexte aux documents, le tout dans le cadre d'un processus évolutif. Pour en savoir plus, visitez la page [Mise en garde – terminologie historique](#) de BAC.

Ottawa, February 6, 1922.

Memorandum.

Mr. Scott-

The Reverend Father J. Welch of New Westminster, B. C., Supervisor of the Indian work of the Oblate Order in his area, made certain requests during his recent visit to the Department.

In brief, he asked for an outbuilding for the St. Mary's Boarding School at Mission, B. C. to serve as laundry, kitchen and sewing-room. His approximation of the cost is \$10,000.00. A new barn to cost \$5,000.00 is urgently needed and the same amount is required to enlarge the present building to provide additional classroom, play-room and dormitory space.

You will remember that the Department promised careful consideration in connection with the needs at this school and at the Squamish Boarding School, North Vancouver. I have placed another memorandum on the file of the last named institution.

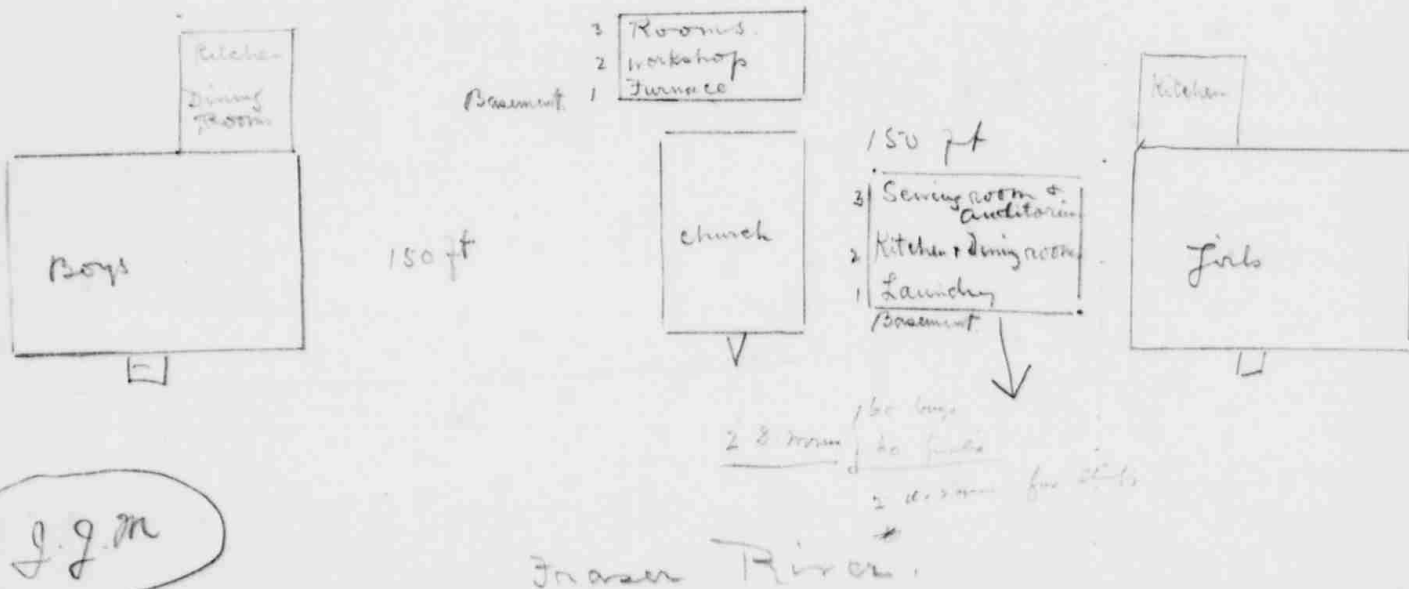

Russell F. Heimer
Supt. of Indian Education.

Mission

Improvements suggested:

- 1- New building consisting of a Basement, Ground floor, First floor.
Basement for Laundry and cellar.
Ground floor consisting of one Kitchen and pantry, four dining rooms.
First floor: sewing room, linen and clothes room.

2- Alterations:

In the boys' school.

Present recreation room to be converted into a class room (giving the Institution two class rooms or if they are united one large, well ventilated class room)

Present Pantry to be used for shower baths and ~~xxix~~ toilet.

Present Kitchen and dining rooms, to be used for recreation room.

Top story, next to Dormitory, in the wing, to be altered into dormitory, will accomodate twenty boys.

In the Girls' school:

Present Kitchen, dining room, to be converted into recreation room for girls, and Indian parlor.

Present recreation room, to contain shower baths and bath rooms and toilet for girls. Cloake room too.

Present Indian parlor and room, will be used for hospital purposes.

Sewing room, converted into dormitory. Will accomodate ten children.

3- Advantages:

Single Kitchen:

Saving labor and expenses.

~~But~~ Giving the boys more congenial work and ~~the~~ placing the girls in their proper place.

Having a central building, which might be called a technical building, for the girls, discipline will be easier, the work will be more efficient, and the running of the school will be more economical.

Central building for Kitchen (with the existing central furnace) away from main buildings, fire risk greatly lessened.

More accomodation for pupils will be obtained: (30)
Ninety children at school at present and some fifteen applications turned down.

Alterations will provide ~~the~~ the children (each side, with a well ventilated, large recreation room, rainy days being numerous, the need of a large recreation room is obvious.

Better class room

Cleanliness easily maintained, sanitary condition children will be able to take frequent baths.

The need of a laundry is obvious.

The taxes increasing, ways and means to run the school economically and with great efficiency must be found. The above alterarions will help.

We must economize or be compelled to close St. Mary's as an Indian School

Mr. F. J. F.
MEMORANDUM

Mr. Scott.

With reference to the attached memorandum and sketch handed you yesterday by the Rev. Father Welch regarding improvements asked for at the St. Mary's Indian School, Mission, B. C., I beg to report that the approximate estimate of cost of erecting a building to provide for a new laundry, pupils' and staff's dining-rooms, kitchen, pantry and store-rooms, and a combined sewing and recreation room would be \$12000.00. The heating of this building could be provided for by connecting up with the central heating plant at the school if the boiler now installed is large enough to take care of the additional radiation.

Referring to the alterations asked for in the existing boys' and girls' buildings, according to information contained in their memorandum and furnished verbally by Father Welch, the cost would not in my opinion exceed \$2000.00.

I understand that the existing school buildings are owned by the Church.

MEMORANDUM

Ottawa, February 4th, 1922.

The Honourable J.H. King,
Minister of Public Works,
O T T A W A, Ont.

3530

Honourable Sir:-

I have come to Ottawa to ask the Indian Department to make certain important improvements in St Mary's Indian School at Mission, B.C., viz:

- A--1c: to erect a steam laundry. The washing (for 100 persons) is now done in a shed and all by hand;
2c: above the laundry to build a common kitchen with dining rooms for boys, girls and staff;
3c: as a third story (or second story if laundry is put in a basement) a large sewing room which would also serve the purpose of an auditorium for the children's concerts.
- B-----We have a farm in connection with the school, the produce of which goes to the upkeep of the school children, and yet, this farm land is taxed by the municipality to the extent of about \$1,000.00 per annum or nearly one sixth of our per capita grant. We consider that these taxes should be borne by the Indian Department.
- C-----A barn is urgently needed but the school has no funds with which to erect it, as practically the entire Government grant each year and all the produce of the farm go to the support and education of the Indian children, who after all, are the wards of the Government. Would the Department be willing to vote us \$5,000.00 towards a new barn?
- D-----When I have explained to Mr Duncan C. Scott who has always shown great interest in the welfare of our Indians, how by a small outlay, the class-rooms, play-rooms and dormitories could be enlarged, and provision be easily made for 20 or 30 more pupils. *Larger indoor play-rooms are much needed at the Coast where we have too much rain*
- E-----Lastly, I am making an appeal in behalf of the Indian School in North Vancouver. The Department in all fairness should give them additional help or build them a new school. At present the children and the Sisters are packed like the proverbial sardines. For lack of funds they cannot better conditions. As at St Mary's (Mission B.C.) their little garden and orchard are heavily taxed. The per capita grant is barely enough to supply the children and Sisters with food. It is only by appealing to the charity of other institutions that they can make ends meet. These hardworking and self sacrificing women are the servants of the Government; why should they be forced to beg, in be able to carry on their noble work?

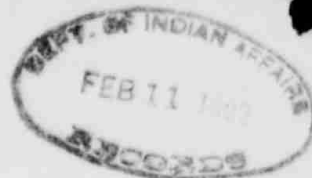

J. Welch. D.M.P.
Vicar of Missions
New Westminster

MEMORANDUM.

Rev. Father Welch called at the office yesterday and discussed the improvements required at the Mission School, B. C. The new building which is asked for should provide the following accommodation:-

BASEMENT,-

Laundry, store-rooms, and bakery.

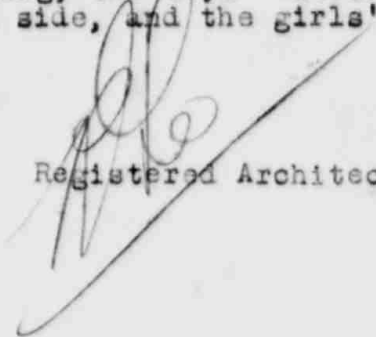

GROUND FLOOR,-

Kitchen, pantry, store-rooms, two staff dining-rooms with accommodation for twelve in each, two pupils' dining-rooms with accommodation for sixty in each.

FIRST FLOOR,-

First floor to be all in one room and used as a sewing-room and assembly-hall.

In planning the building, the boys' entrance to the dining-room should be on the left side, and the girls' on the right side of the building.

OTTAWA, April 18th, 1922.

Madam, -

I have to acknowledge the receipt of a requisition which you forwarded from the Principal of St. Mary's Mission Boarding School requesting that 200 feet of 2" fire hose be supplied for the use of the school.

In reply I beg to say that the Department will approve of the purchase of this quantity of fire hose. It will be necessary, before making the purchase, to obtain competitive prices from several dealers handling this material, and the purchase should be made from the one quoting the lowest price. Either yourself or the Principal should obtain prices.

It is noted that no reference is made to a nozzle or couplings. It may be that the Principal has these on hand, but if not, a nozzle and the necessary couplings can also be purchased.

Properly certified vouchers should be forwarded covering the expenditure incurred in the purchase of the hose, etc., to which should be attached a memorandum showing the names of the firms asked to quote a price and the prices quoted.

Your obedient servant,

A. F. MacKenzie,
Actg. Asst. Deputy and Secretary.

And now a word in connection with St. Mary's:
When I was in Ottawa I placed before Mr. Scott and Mr. Orr
a plan to erect a steam laundry, a central kitchen with
dining rooms for boys, girls, sisters and male assistants,
and overhead a sewing room and auditorium. A new school
at St. Mary's will not be required for many, many years, as
it is in an excellent state of preservation, but the steam
laundry, central kitchen, etc., should I think be taken into
consideration by the Government without delay. If this were
done, and a new barn put up at a later date, St. Mary's
would be splendidly equipped. These improvements, I take it,
will not be affected by negotiations now taking place, no
matter what settlement may be arrived at in regard to the
taking over of our schools by the Government.

Referring to paragraph 6 of the letter, I beg to state that I am made to understand that a sum of \$6,000 is included in the supplementary estimates for repairs to the main building and barns at St. Mary's. I suppose then that the request formerly made and presently renewed by Rev. Fr. Welch can not be granted this year. If not, please indicate the nature of repairs that the sum of \$6,000 will permit.

Ottawa, May 16, 1922.

Reverend Sir:-

I am directed to acknowledge that portion of your letter of the 13th instant, referring to the addition and repairs to the St. Mary's Boarding School, B. C. I have noted Father Welch's remarks to you, concerning the need, and have to reply that we were unsuccessful in arranging to have voted the total amount required for the separate administration building.

In the supplementary estimates for the present year, an item has been included with a view to erecting a barn at the St. Mary's Boarding School this year. The major improvements will have to be postponed. It might be well if you would have Father Welch secure for us a rough sketch of the type of barn the school authorities desire and an intimation as to the amount of stock that is to be accommodated.

Concerning the question of the taxes at the St. Mary's and Squamish Boarding Schools, a further communication will be addressed to you.

Your obedient servant,

Sgt (R. T. F.)
Russell T. Ferrier,
Supt. of Indian Education.

RECORDED

Dear Mr. Scott,

In reply to your recent communication regarding the erection of a new barn for St. Mary's School, Mission, B.C., I beg to say that a barn on lines similar to the one of Kamloops Industrial School, including a silo, will meet all our needs.

The amount of stock to be accommodated is as follows:
4 horses, 16 to 18 milch cows, 6 to 8 yearlings and about 12 calves. The School produces about 80 tons of hay per annum.

I have the honour to be,

Yours sincerely,

J. Welch. D.M.S.

Memorandum:

Honourable Charles Stewart.

Provision was made in the Supplementary Estimates for the funds necessary to erect a barn in connection with the St. Mary's Indian Boarding School at Mission, B.C. Plans and specifications have been prepared for a building to cost approximately \$6,000.00. We are ready to call for tenders, and I would ask for your approval.

I think it will be sufficient to advertise in the Vancouver and Victoria papers:-

Vancouver.....'The Province' and 'The World'
Victoria.....'The Times' and 'The Colonist'

TENDERS WANTED.

SEALED TENDERS addressed to the undersigned, and endorsed on the envelope "TENDER FOR BARN FOR ST. MARY'S INDIAN BOARDING SCHOOL, MISSION, B.C." will be received up to noon of the eighteenth day of August, 1922.

Plans and specifications may be seen at the offices of W. E. Ditchburn, Chief Inspector of Indian Agencies, Victoria, B. C.; R. H. Cairns, Inspector of Indian Schools, Post Office Building, Vancouver, B.C.; St. Mary's Indian Boarding School at Mission, B.C., and at the Department at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank for 10% of the amount of the tender, payable to the order of the undersigned. (War Bonds and Cheque if required to make up an odd amount which amount will be forfeited if the person or person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The building to be fully completed within three months after the signing of the contract.

The lowest or any tender not necessarily accepted.

Ottawa, August 23rd, 1922.

Memorandum,-

Mr. Scott.

Plans and specifications were prepared for a new barn required at the St. Mary's Indian Boarding School at Mission, B.C. Tenders were invited by advertising in the Victoria and Vancouver papers and in response the following prices have been received,-

Smith Bros. & Wilson, Ltd., Vancouver,	\$12835.00
R.M. Brock, Chilliwack, B.C.,	11000.00
Baynes & Horie, Vancouver,	12259.00

All of the above tenderers have sent in the required deposit security with their tenders.

My estimate of the cost of this building is approximately \$12,000. As Mr. Brock's tender is the lowest and a fair and reasonable price for the work, I beg to recommend that it be accepted.

[Handwritten Signature]

Ottawa, August 26th, 1922.

His Excellency,

The Governor General in Council,

The undersigned begs to report that a new barn being required at the St. Mary's Indian Boarding School at Mission, in the Province of British Columbia, tenders were invited by advertising in the Victoria and Vancouver papers, and in response the following prices have been received.-

Smith Bros. & Wilson, Ltd., Vancouver,	\$12855.00
R.H. Brock, Chilliwack, B.C.,	11000.00
Baynes & Horie, Vancouver,	12259.00

The undersigned would, therefore, recommend that the contract for the barn at the St. Mary's Indian Boarding School be awarded, pursuant to the requirements of sub-Section 2 of Section 36 of the Public Works Act, to Mr. R. H. Brock for the amount of his tender as above cited, the same being considered by the Architect of this Department as a fair and reasonable charge.

Funds are available for this purpose from the Vote for Indian Education.

Superintendent General
of Indian Affairs.

Certified copy of a Report of the Committee of the Privy Council, approved by His Excellency the Governor General on the

571943

571943

The Committee of the Privy Council have had before them a report, dated 26th August, 1922, from the Superintendent General of Indian Affairs, stating that a new barn being required at the St. Mary's Indian Boarding School at Mission, in the Province of British Columbia, tenders were invited by advertising in the Victoria and Vancouver papers, and in response the following prices have been received:

Smith Bros. & Wilson, Ltd., Vancouver,	\$12,835
R. H. Brock, Chilliwack, B.C.,	11,000
Baynes & Horie, Vancouver,	12,259.

The Minister, therefore, recommends that the contract for the barn at the St. Mary's Indian Boarding School be awarded, pursuant to the requirements of subsection 2 of Section 36 of the Public Works Act, to Mr. R. H. Brock for the amount of his tender as above cited the same being considered by the Architect of the Department of Indian Affairs as a fair and reasonable charge. Funds are available for this purpose from the Vote for Indian Education.

The Committee concur in the foregoing recommendation and submit the same for approval.

W. B. Mackenzie
Clerk of the Privy Council

The Honourable

The Superintendent General of Indian Affairs.

ST. MARY'S BOARDING SCHOOL

By

There is a farm and garden at this institution, large enough for a big residential school. All the priests in the vicinity are in favour of this. A small increase in pupilage - say from 84 to 90 - could be offered now. Father Duplanil suggests the principle of having parents pay something to the school: the educational facilities would be more appreciated. In connection with recruiting and the return of pupils Agent Graham of Lytton has not been much help to the Principal.

*No action
now*

New flooring is needed in the girls' playroom and in both dining rooms (boys' and girls' buildings separate). Girls' dormitories should be provided with fire escapes.

In the near future, a special building should be provided (kitchen and 4 dining rooms). Space would then be available for playrooms, infirmaries and showers.

CONDITIONS. Approved by Board of Railway Commissioners for Canada, under Order 162, dated March 30, 1916.
It is agreed between the sender of the message on the face of this form and this Company, that said Company shall not be liable for damages arising from failure to transmit or deliver, or for any error in the transmission or delivery of any unrepeatable telegram, whether happening from negligence of its servants or otherwise, or for delays from interruptions in the working of its lines, or for error in cipher or obscure messages, or for errors from illegible writing, beyond the amount received for sending the same.
To guard against errors, the Company will repeat back any telegram for an extra payment of one-half the regular rate; and, in that case, the Company shall be liable for damages suffered by the sender to an extent not exceeding \$100.00, due to the negligence of the Company in the transmission or delivery of the telegram.
Correctness in the transmission and delivery of messages can be insured by contract in writing, stating agreed amount of risk, and payment of premium thereon at the following rates, in addition to the usual charge for repeated messages, viz: one per cent. for any distance not exceeding one thousand miles, and two per cent. for any greater distance.
This Company shall not be liable for the actor omission of any other Company, but will endeavor to forward the telegram by any other Telegraph Company necessary to reaching its destination, but only as the agent of the sender and without liability therefor. The Company shall not be responsible for messages until the same are presented and accepted at one of its transmitting offices; if a message is sent to such office by one of the Company's messengers, he acts for that purpose as the sender's agent; if by telephone, the person receiving the message acts therein as agent of the sender, being authorized to assent to these conditions for the sender. This Company shall not be liable in any case for damages, unless the same be claimed, in writing, within sixty days after receipt of the telegram for transmission.
No employee of the Company shall vary the foregoing.

Reverend Sir,-

I beg to advise you that Mr. Brock's tender of \$11,000.00 is accepted for the building of the barn at the St. Mary's Indian Boarding School, and I would ask you to be good enough to see that the barn is built in accordance with the plans and specifications, also to issue the necessary certificates in duplicate and forward them to the Department, for payment on Mr. Brock's contract. I am sending you under separate cover Certificate Forms for this purpose, together with a copy of the plans and specifications.

You will note in the specifications, that the Department pays up to 90% of the value of labour and materials actually in the building at the time the certificate is issued.

Your obedient servant,

(J. D. McLean)

"2"

File 119704-5A (continued.)

7/---To substitute stalls Style B., page 67 fig. ~~284~~ 284. The sure stop post is unnecessary for our cattle. It is costly, it gathers dust and dirt. It does not last long when handled by boys. Mr. Moore, manager of the Colony Farm, Essondale, B.C., a B.C. Gvt. Institution, has discarded them. Leading farmers will not have them.

EXPENSES:

The expenses needed to cover the alterations in windows, etc. will amount to \$128.00, as per contractor's statement on file in my office. Savings in money effected by the discard of lifting mangers and sure stop postswill amount to \$128.00. The alterations mentioned will improve the barns and will not cost an additional dollar to the Dpt.

For this reason and other reasons stated in this letter I feel sure that you will approve the alterations. However, in order to help the contractor to place in his orders, you will oblige me greatly by wiring me your approval, if given.

Sincerely your,

John Luyland

Re. barns for St. Mary's Indian School,
Mission, B.C.
FILE 119704-5A.

Dear Sir:

I beg to submit for the approval of the Department the following alterations in the plans for new barns in course of construction, at Mission, B.C., for the St. Mary's Indian School, viz.:

WINDOWS:

- 1/---To enlarge 10 windows, 5 on each side, in the cows barn (sheet 4) and to make them with 9 lights 10x14 instead of four lights.
- 2/---To place 2 new windows, 9 lights 10x14, on the North East side, sheet 1.
- 3/---To place a new window in the maternity pen, 6 lights 10x12
- 4/---To remove window in calf pen from its present location to the South East corner of pen, and to enlarge it from 4 lights to 6 lights, 10x12. The present window admits in light only through the Hoist room, sheet 4.
- 5/---To enlarge windows in horses' stable and feed room from 4 lights to 6 lights 10x12.

N.B. All the above windows with screen and storm sash as per specifications, pages 28 & 29.

REASONS FOR ABOVE ALTERATIONS:

We have a very mild climate here at St. Mary's. It rains very frequently. It is dark and cloudy the greater part of the year. Barns need as much light as possible. It is the experience of leading farmers and Experimental Farms in the District. It is recommended in fighting tuberculosis among the cattle.

MANGERS:--

- 6/---To replace the 6 lifting mangers mentioned on page 18 of specifications, by steel divisions, B.T. book, fig. 54 page 56 of new catalog. Specifications call for ~~22~~ concrete mangers for 22 stalls. Lifting mangers are unnecessary if steel divisions are used.

Lifting mangers do not last more than four years, the bottom must be replace after a year. Salt eats up the iron and the continual licking by cattle destroys it completely in a very short time. Concrete is more permanent and easier to clean.

---2---

File 119704-5A (continued)

4---Hay will not be unloaded from the South East end of barn, (sheet No.2) and track marked on sheet No. 2 is not needed. For same reason ~~again~~ swing pole attachment is not required. For same reason again the large double door, sheet No.1, is not necessary. However the windows on hinges and part of the present door as per plan are to be kept and a ladder to them is to be constructed.

The above alterations will save the Dpt. one hundred and five dollars. The contractor accepts them at above value. Furthermore the Contractor agrees to have light installed as described in #1 of this letter and sketched in sheet herein inclosed, provided the suggested alterations be made and an additional sum of TWO HUNDRED AND FORTY FOUR dollars be paid him over and above sum agreed upon in original contract with the Dpt. of Indian Affairs.

It is needless to draw your attention to the need of electric light in the barn. Fire protection alone demands it, convenience suggests it. I feel sure that you will see the reasonableness of additions and alterations and that you will be kind enough to recommend them.

The barn is going up rapidly, and if weather is favorable it will be completed by New Year's day.

You will oblige me greatly by wiring me your answer, which I hope to be favorable.

Yours sincerely

John Duplain

119704-5

St. Mary's Mission Indian School

575251

Mission City, B.C. November 20 1922 192

J.D. McLean Esq.
Assistant Deputy and Secretary,
Dpt. of Indian Affairs,
Ottawa.

Re. Barn for St. Mary's Ind. School.
File 119704-5A

Dear Sir:

I beg to submit for the approval of the Dpt. of Indian Affairs, Ottawa, the following additions to and alterations in the plan for barn under construction, at Mission, B.C., for the St. Mary's Indian Boarding School, File 119704-5A.

1---Install electric light in barn and root cellar as per sketch herein inclosed. Mr. Brock, the contractor, after getting quotations, agrees to supply 1600 feet of No.6 weather proof wire, 8 25 ft. cedar poles with all the necessary fittings, to wire building and install 19 light outlets complete, two outside lights having goose neck brackets and 14" enamelled shades, five switches with all the necessary distributing cabinet main switch and fuse blocks. Work to be done according to the rules of the National Board of Fire Underwriters and the regulations of the Provincial Inspector of Electrical Energy. This work, complete, will cost THREE HUNDRED AND FORTY EIGHT dollars.

2---On page 22 of specifications, (Interior ceiling board), we read: "lay Eddy's heavy building paper".. [in the inside] Here at Mission we enjoy a mild climate. Paper is not necessary especially when Architect has so well provided for outside protection.

3--- Again on page 24 we read: "over which lay approved water proof paper. We have a great deal of rain. After a while water will soak through the shingles. Paper will hold moisture and retard the drying up of shingles, which will, on that account, deteriorate more quickly. Paper instead of being a protection, will become in some way a detriment to new building. I suggest to have none.

ALSO

OR DATE OF THIS LETTER

575217

Sir,—

I beg to forward herewith Certificate No. 1, in duplicate, of Mr. H. Brock, Contractor of the new Barn at St. Mary's Mission Indian Boarding School, Mission, calling for a payment of \$3,700.00 on account of the Contract.

*Paul
Hoskins*

The Certificate is duly signed by the Rev. J. Duplanil, who in addition to his duties as Principal of the School has been appointed Inspector of Construction, and in this connection I should like to be informed as to what recompense the Department propose to give Father Duplanil for the performances of these extra duties. It will be readily appreciated that this entails a great amount of work, not only in superintending the actual construction work at the School, but in travelling throughout the District inspecting the various forms of barn equipment, with a view to deciding the particular type most suitable for installation at the Mission School.

The Building Inspector employed by the Department in connection with the Coqualeetza Industrial Institute, Chilliwack, received I understand, \$7.00 per day for his services, and it would appear to be only fair the Father Duplanil be paid for his work by the Department.

Your obedient servant,

A.O.W. Daunt

DEPARTMENT OF INDIAN AFFAIRS

CANADA

November 28, 1922.

Approved
tl
MEMORANDUM.

MR. SCOTT.

A letter has to-day been received from the Reverend Principal of the St. Mary's Mission Indian Boarding School, asking for a few minor changes in the plans and specifications for the barn now being built at the school by Mr. Brock. He asks that some of the items included in the specifications, such as the providing of building paper under sheeting of ceiling and on roof, and the hay carrier on the East end of the barn, also the swing pole and double door be omitted. By leaving out these items which he considers not necessary, a saving of \$105.00 will be made.

He has asked for authority to provide electric lighting for the barn, and has submitted a price from the contractor of \$348.00 for this work, which, by deducting the \$105.00 allowed for the changes in the plans ~~it will make a difference in the~~ price for the lighting, ~~at~~ \$244.00.

As it is very unsafe to have Indian boys work around a large barn with the lanterns, I beg to recommend for your consideration, the advisability of having electric lights installed as asked for, at the price quoted by Mr. Brock, which is very reasonable for the work entailed.

ST MARY'S INDIAN BOARDING SCHOOL

10-STEAM LAUNDRY:-The washing (for 100 persons) is now done in a shed and all by hand. This request has already been made by Very Rev. Welch on Feb. 4th, 1922.

20-KITCHEN:- Above the laundry in the same letter of V. Rev. Fr Welch referred to, the building of a small kitchen with dining room for boys, girls and staff was asked.

30-SEWING ROOM:-As a 3rd story (or a second story if the laundry is placed in the basement) to the above building a large sewing room which would also serve the purpose of an auditorium for the children's concerts was asked in conjunction with the above matter and in the same letter.

40-PURCHASE:-Very Rev. Fr Welch has been writing to me quite often regarding the purchase by the Department of St Mary's Mission's School. The estimated value, covering the school and farm buildings but exclusive of the farm lands is set at the sum of \$45,000.00. I have no complete description of the property.

Ottawa, December 6, 1922.

Dear Sir,-

Replying to your letter of the 20th ult., with reference to your remarks regarding a remuneration to the Reverend J. Duplanil for his work as Inspector of Construction in the erection of the new barn at the St. Mary's Boarding School, I beg to advise you that the Department considers that the Principal should perform these duties without charge, as the building of a barn does not entail a great deal of supervision, also on account of the great benefits that he will receive from the erection of this barn.

With reference to the employment of the Inspector referred to in your letter, at the Coqualeetza Institute, this was for the erection of a portion of a new building, and it was necessary to have an inspector on the work thoroughly acquainted with all the details of building construction. I may say, however, that a barn is now being built at the Coqualeetza Institute, and the Reverend Principal is acting as Inspector of Construction and is not receiving any remuneration for this work.

Your obedient servant,

(J. D. McLean)
Asst. Deputy and Secretary.

MEMORANDUM

MR. SCOTT

In the Supplementary Estimates for the past fiscal year there was included an item for the payment of the taxes at the St. Mary's Boarding School, B. C. This item was in conjunction with that concerning a larger payment for the taxes at the Squamish Boarding School. You have already authorized the payment of the taxes at the last named institution for a second year, and arrangements are being made to vote the amount needed (roughly \$950) from year to year.

The taxes at St. Mary's are in the neighborhood of \$450. The amount is hardly large enough to vote from year to year; but, as the Rev. Father Welch, the Rev. Principal and the Indian Agent are all under the impression that we are to meet this obligation each year, I respectfully ask for your instructions.

I have examined the correspondence and memoranda in this connection and, although no promise was made to care for the taxes at St. Mary's from year to year, there is no definite statement to that effect.

R. J. S.
Supt. of Indian Education.

get paper
to be mentioned in order to obtain from the Dpt. favorable consideration and approval. A large silo cannot be filled by hand. A blower, cutter and gas engine are required. Without them the silo may be an ornament on a farm, but its usefulness is practically nil. Will you be kind enough to recommend the purchase of these silo "complements".

The barn is well put together and is a credit to the Architect who planned it, to the Contractor who built it and to the Dpt. that financed it. We all wish for a complete, compact and convenient barn. This desire explains the many requests contained in this letter.

The barn is completed with the exception of last coat of paint on the outside, which, owing to weather conditions cannot be given much before April or May. When you notify the Dpt., please bring to their attention the fact that Mr. Brock, the contractor, has given satisfaction in every respect. He has not spared labor nor money to get the best results. The barn he has now completed for St. Mary's Indian School is a very creditable piece of work.

yes
I mentioned to you that I wish to occupy the new barn as soon as possible. The old buildings must come down at once. The ground which they occupy must be prepared for cultivation, the soil is very rich and therefore will be exceptionally good for this year's garden. Do you think that the Dpt. will object to occupying the new barn at once, though the last coat of painting on the outside is not on. The Contractor tells me that he has no objection. An early reply will oblige me greatly.

With best wishes, I remain, dear Sir,
Respectfully yours

J. L. L. L. L.

POOR COPY

St. Mary's Mission Indian School

Mission City, B.C. January 27-1923 192

A. O'N. Daunt Esq.
Indian Agent,
New Westminster, B.C.

Dear Mr. Daunt,

I am sending you herewith Certificate No. 3 in favor of Mr. H. Brock, for labor and material on the barn for St. Mary's Indian Boarding School, Mission, B.C.--Dpt. File No. 119704-5A.

If you compare this certificate with the others previously sent to the Dpt. you will see that a slight mistake has been made. After the line "labour and material in the building at first certificate", read \$4,111.10 instead of \$3,700.00---Again, after the next line "additional at second certificate" read \$3,222.25 instead of \$2,900.00.---Certificates are issued for 90% of labor and material actually in the building when they are sent to Ottawa. The mistake did *not* matter much. However, if you think it advisable, please have former certificates corrected accordingly.

Last week, when you visited St. Mary's, your attention was called to a ditch dug by the Contractor, Mr. Brock, in connection with root cellar. You still remember the length and depth of it (80 ft. and 8-9-10 ft.), the purpose thereof being to keep this cellar absolutely free from water. When digging it, a spring was found in a corner, hence the need of an outlet. Mr. Brock could not possibly foresee this geological freak. I do not think that he should suffer loss because of it. The sum of \$97.50 was spent by him in labor. Will you be kind enough to recommend that compensation be given him and that an additional extra of ~~\$97.50~~ be paid him.

You will oblige me greatly by recommending also to the Dpt. that eaves-trough be attached to the roof of the new barn. We have a great deal of rain, and unless water is taken care of in a proper manner and carried away, there will be an "awful mess" around the building. This addition to plans would cost the Dpt. only \$75.80, viz. 170 ft. of eaves-trough at 30¢ per foot, 56 ft. of down pipes @ 30¢ per foot, 4 elbows @ 2.00 each. You will remember that Mr. Cairns, the Inspector of Indian Schools, strongly recommended this improvement.

Another need in connection with the silo requires only

ARCHITECT.

Architect
Sir,

I beg to forward herewith Requisition No. 3 calling for a payment of \$3,339.60 to Mr. H. Brock, Contractor for the barn for St. Mary's Mission Boarding School at Mission, B.C., together with a letter received from the Principal in connection therewith.

9700
It will be noticed that the Contractor has been put to considerable expense, in connection with providing drainage from the root cellar, and I shall be glad to learn whether the Department is disposed to assist him in this respect, as he could hardly foresee the circumstances in bidding for the work.

1700
I would also strongly recommend that eaves-trough be attached to the roof of the barn, the climate at Mission is exceedingly wet, and unless the water is properly taken care of, it will be impossible to keep the surroundings of the building clean and dry, if this is not completed.

You attention is also directed to Father Duplanil's remarks concerning the silo, and which any farmer will endorse.

In view of the wet weather usually experienced at this time of the year, it will in all probability be impossible for the Contractor to paint the outside of the barn until April or May, and as the building is needed by the School, and as it has already been finished inside, I shall be glad to have authority of the Department for its occupation and use before the outside painting is done. I took this point up with the Contractor and he expressed his willingness, provided the School took over the insurance, as it would hardly be fair to expose him to loss while they were occupying the premises.

Your obedient servant,

A. O'N. Daunt

CANADA

Ottawa, February 8, 1923.

MEMORANDUM

Approved
W. R. Scott

A letter has to-day been received from Indian Agent Daunt, with reference to the barn now being built at St. Mary's Mission Boarding School, N. C. Owing to the excessive amount of rain in that section of the country, he has recommended that save-toughing be installed on the new barn, the approximate cost of which would be approximately \$70.00.

Mr. Daunt also states in his letter that in the building of the barn, an unforeseen expense had occurred in digging the root cellar, as a spring was encountered and it was necessary to dig a ditch in order to drain the water which was accumulating owing to this spring. The cost of this ditch is approximately \$27.00, and Indian Agent Daunt recommends that the contractor be paid this amount.

With reference to the two items above, I beg to recommend for your consideration, that the save-toughing be authorized, and that the Department pay for the ditch required to drain the root cellar.

Dear Sir:-

The Stock Barn for St Mary's Indian School at Mission, B.C., is completed except for part outside painting. Bad weather made it impossible to complete and the chances for a first class job are not good till April or May.

In the meantime the Reverend Principal of the School is anxious to move feed and stock into the new barn, and this is encouraged by the Contractor who would like to see the building occupied.

I beg to call your attention to payments made by your Department to the Contractor, namely: Certificates amounting in all to the sum of \$9939.60 have been issued, and but \$200.00 value in work and material is required to complete the contract. The Department holds \$2404.00 to secure this completion. Under the circumstances would your Department make a further payment of say; \$1304.00 or all but the original deposit?

Trusting this will receive your favourable consideration,

I am,

Yours Respectfully,

Re. Barn for St. Mary's Indian School,
File 119704-5A

Dear Sir:

In reply to your letter of February 27th, I beg to inclose herein a fourth certificate in behalf of Mr. H.R. Brock, for labor and material on the barn for the St. Mary's Indian School, Mission, B.C. For a whole week we did enjoy beautiful weather and the barn was completed last Saturday noon, March 3 1923. As I stated in my letter to Mr. Daunt, the Indian Agent, (Jan. 27 1923), the barn "is well put together and is a credit to the architect who planned it, to the Contractor who built it and the Dpt. that financed it.

According to instructions contained in your letter of Oct. 11 1922, certificates "are issued for 90 % of ~~the~~ the value of labour and material actually in the building at the time the certificate is issued". In compliance with these instructions the certificates I signed represent only 90% of labor and material actually in the barn, the balance "to be paid 30 days after the full and satisfactory completion of the work". (Specifications page 2). Certificates signed by me amount to \$10,274.40, and the balance due Mr. Brock amount to \$1,141.60. The latter balance was the subject of Mr. Brock's letter to the Dpt.

I am enclosing herewith a copy of the Contractor's guarantee. I kept the original in my Office.

Respectfully yours,

John A. L. L. L.

April 19th, 1923. *19*

582489

Attention Mr. Ferrier.

Sir,

I have received a request from the Principal of St. Mary's Mission Indian Boarding School for 5,500 Feet of No. 1 Fir Flooring, edge grain. This material is required to repair the floors of the boys' dining room and kitchen, hall leading to dining room and dormitory, girls' kitchen, dining room and recreation room.

The Principal informs me that Mr. Cairns, Inspector of Schools, when he visited there last week, suggested that an application for this lumber be made to the Department. I am further informed that Mr. Ferrier when out here last year, told the Principal that such an application would receive favourable consideration.

I may say that I have seen the floors, in question, myself and I consider the repair necessary, and would recommend that the above named material be supplied.

Your obedient servant,

A.O.N. Daunt.

OK
Memorandum

Mr. Scott:

600 R77.

Mr. Indian Agent Daunt, at New Westminster, and the Rev. Principal of St. Mary's Mission Indian Boarding School have requisitioned for 5500 ft. of fir flooring. This material is worth roughly \$500 and is needed in several portions of the boys' and girls' buildings. Mr. Cairns has suggested that this request be submitted at this time. I have examined the notes made at the time of my visit to this school, and I find that I noted the poor condition of the floor in several portions of the buildings. I should be pleased to have your authority to submit the matter to the Purchasing Commission and arrange to have the work done. Most of the labour will be performed by the older boys, under the supervision of the male members of the staff.

R77.
Supt. of Indian Education.

Ottawa, May 3rd, 1923.

Sir:

I have to acknowledge the receipt of your letter of the 19th ultimo, regarding the request made by the Principal of the St. Mary's Mission Indian Boarding School for fir flooring to repair the floors of the boys' dining room and kitchen, hall leading to dining room and dormitory, girls' kitchen, dining room and recreation room.

In reply I beg to say that the Department will approve of the expenditure required for this purpose. You may, therefore, arrange for the purchase of 5500 feet of No. 1 fir flooring, edge grain, the quantity which you state will be required. The Purchasing Commission of Canada have directed that you obtain prices from the following firms for the supplying of this flooring, and that the purchase be made from the firm quoting the lowest price:

B. C. Mills Timber & Trading Co. Ltd., Dunlevy Avenue,	Vancouver, B.C.,
Vancouver Lumber Co. Ltd., South End Connaught Bridge,	"
Southern Alberta Lumber & Supply Co. Ltd., Pacific Building,	"
Allen-Stoltz Co. Ltd., 207 Hastings St. W.,	"
Interprovincial Lumber Co. Ltd., Standard Bank Building,	"
B. C. Lumber & Shingle Manufacturers, Ltd., 857 Hastings St.,	"
Duncan Lumber Co. 850 Hastings St.,	"
Fraser Mills Sash Door & Shingle Co. Ltd., 736 Granville St.,	"
Hanbury Timber Products, 850 Hastings St.,	"
Smith-Hutchinson Lumber Co. Ltd., 207 Hastings St.,	"

After the purchase has been made you should forward properly

IN YOUR REPLY REFER TO

No. 3-8-A.

ALSO

TO DATE OF THIS LETTER

Sir.—

Under date of January the 29th, I forwarded you a letter received from the Principal of St. Mary's Mission Indian Boarding School, making various requests, in connection with a new Barn erected on the premises by the Department.

In your letter No. 119704-5 of February the 12th, you gave authority for some of the items referred to in the communication of the Principal, but no reference was made to his request for a blower, cutter and gas engine, in connection with a large Silo erected at the Barn. As these articles may be considered more or less part of the Silo equipment, may I be informed please whether the Department intend to install them and if so what steps should be taken to obtain them?

Your obedient servant,

A.O.N. Daunt.
Indian Agent.

Sir:

I have your No. 3-8-A of the 21st instant, relative to supplying a blower, cutter and gas engine to be used in connection with a silo at the new barn for the St. Mary's Indian Boarding School.

In reply I beg to state that the Department is favourably disposed to purchase this equipment for the school, and I should be pleased if you would intimate the exact type of cutter and blower that is required. You should enclose a catalogue clipping from some well known manufacturers and the Department will arrange to secure competitive prices.

If the institution has no stationary gas engine which is suitable for running the equipment mentioned above, you should also recommend the purchase of this extra machinery. Please inform the Department what horse power is required, if an engine has to be purchased.

Your obedient servant,

J. D. McLEAN

10-Inch Papec Ensilage Cutter, Mounted

It Throws as Well as Blows

Page 39 is edited by users of 10-inch Papec Cutters. The work done by this size has agreeably surprised many people, especially those who have 4 or 5 horse power gasoline engines. This little machine is a wonder.

The above illustration represents our small size cutter, style "R," mounted on four wheels. The illustration in the upper left hand corner shows the same cutter mounted on two wheels. It can be furnished either way. This cutter is always equipped with two knives. It is an excellent size for individual use.

Capacity, Power, Speed, Dimensions and Weights

	R-10 with two Straight Knives		R-10 with two Straight Knives
Tons per hour, 5-in. cut.....	2 to 5	Size of regular pulley.....	10 in.
Horse power, steam.....	3 to 4	Other diameters can furnish.....	8, 12, 14, 16 and 18 in.
Horse power, gasoline.....	3 to 6	Shipping weight, not mounted.....	880 lbs.
Length of cut, approximately.....	1 1/4, 1 1/2, 1 3/4, 1 in.	Shipping weight, mounted on two wheels.....	950 lbs.
Revolution per minute.....	600 to 700	Shipping weight, mounted on four wheels.....	1060 lbs.
Diameter of main shaft.....	1 1/2 in.	Code word, not mounted.....	Reach
Throat Opening at Cutting Plate.....	5 1/4 x 10 1/4 in.	Code word, mounted on two wheels.....	Regal
Length of cutting knives.....	12 3/4 in.	Code word, mounted on four wheels.....	Razor

Belt speed in feet per minute with regular 10 in. pulley, 1830. (For speed with other size pulleys, see page 6.)
This cutter is furnished with four wheel steel truck for mounting, unless otherwise ordered. See page 14 for description of mount.

*An extra charge is made for 16 and 18 inch pulleys. They have 8 inch instead of 6 inch face.

Mounting of The Papec Cutter

Our Method of Mounting the Papec Cutter has Attracted Wide Attention and Won Approval of Farmers Everywhere

The Papec Mounting is strongly constructed of steel channels—there are no wooden parts to twist and warp. There are but few parts, and nothing to get out of order. The Papec style of mounting does not have to be so heavy and massive as on most cutters. The weight is properly distributed throughout. For the style "R" 10-inch cutter, we can furnish either a four wheel mount or a mount of the trailer type, with but two wheels, as shown on page 13. The two wheel mount is an innovation but is practical for moving short distances and will, no doubt, be appreciated by purchasers of this size, owing to the reduced cost.

In setting up the cutter it is only necessary to put up the pipe. The table does not have to be put on or adjusted—all is ready for business but the pipe. When through cutting ensilage, just take down the pipe. The table does not have to be removed or propped up. No other cutter can be set up or taken down as quickly as the Papec.

The Tongue is easily removed, so that load may be driven close to the cutter. Neck-yoke and double-trees are not included in the price of mount.

The Feed Table is located at the right height for the feeder to stand on the ground and feed the corn comfortably. This enables a man to feed faster than when obliged to stand upon a box or a specially constructed sideboard. A load of corn may be driven up close to feeding end of table, where it can be most conveniently handled.

The PETER HAMILTON COMPANY LIMITED

The Peter Hamilton Mower

The Peter Hamilton Mower is especially well adapted for cutting the hay grown on Canadian farms. It is strong and rigid in every part, has great traction power, is easy to draw and operate and absolutely dependable under all conditions, even the most difficult. Nothing but the best materials are used in its construction, and it is carefully built by competent mechanics.

The Main Frame is very staunch—there are no weak spots in it. The drive wheels are high with broad face. There is no lost motion—when the mower goes forward the knives cut.

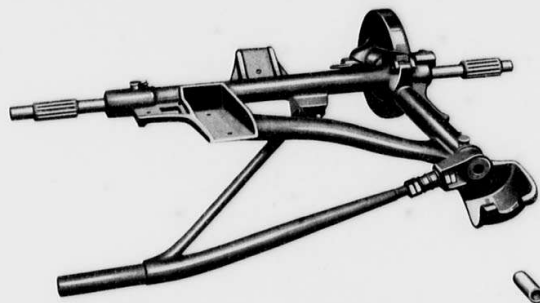

The Push Bar is a steel forging made in one piece, especially heavy and stiff, and is connected at front and rear of the main frame as shown in the illustration. This Bar has adjusting nuts at the front end for lining up the bar, or centering the knife. You always have perfect alignment on Peter Hamilton Mowers.

3

POOR COPY

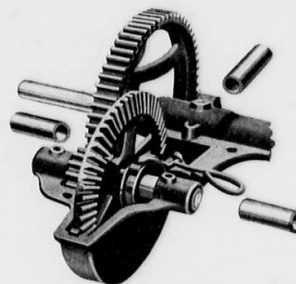

One Piece Main Frame

The Cutter Bar is of Cold Rolled Steel reinforced with a rib running the entire length of the bar, making it strong and rigid enough to ensure a frictionless and smooth running knife. The knife itself is held firmly in place by means of substantial holders and long steel wearing plates against which it runs. These wearing plates are easily replaced when worn and are quite inexpensive.

The Pitman is long and made of best second growth hickory or oak with forged steel jaws at both ends. The Pitman Box is fitted with brass wearing surface and self-acting oil retainers which prevents loss of oil and effectually lubricates the wearing surfaces.

The Tilting Lever can be fixed to give a free adjustment, allowing the guards to adjust themselves automatically to the unevenness of the ground. The guards can be tilted up or down without moving the Cutter Bar backwards or forwards, or out of line with the pitman and frame. A powerful foot lever raises the bar clear of the ground when turning corners, or passing over roots or stones. In raising

4

Powerful Gearing

the bar the outer shoe is raised from the ground first, eliminating all danger of the bar catching on the obstacle. A strong adjustable coil spring, which, as well as assisting the operator in raising the bar also, to a certain extent, carries it on the wheels, thus avoiding considerable friction on the ground, and giving more power for the working parts of the machine.

All Bearings throughout the Mower are either fitted with Roller Bearings or Renewable Frictionless Bearings. The Gears are all accurately made and snugly fitted, so that there is no lost motion. Perfect gears and perfect alignment result in an easy running noiseless machine.

Peter Hamilton Mowers are built in three sizes. Cutter Bars being four and one-half feet, five feet and six feet long. On the six-foot Mower the wheels are larger and farther apart than on the smaller sizes.

No. 4 Steel Rake

Every farmer, who has ever used a No. 4 Peter Hamilton Rake, will tell you that this rake not only rakes up a bigger wind-row and leaves it clearer after dumping, but that it also cleans up the field better than any other rake. The reasons are, the wheels are high in diameter. The Teeth have a big gather and when dumped, lift clear of the wind-row. They rake clean because the high carbon, oil-tempered teeth are curved to bring them well under the rake, so that they slide along the ground picking up all the hay.

The Frame throughout is heavy angle steel, thoroughly braced and trussed so that there is no danger of the rake ever sagging or becoming twisted.

The Self-Dumping Device is one of the most popular features of this rake; it operates from either wheel, a slight pressure on the Foot Lever being sufficient to throw the dump rods into engagement with the Teeth in each hub, where they are held until the Rake Head is raised to its highest point, and the hay is dropped.

6

Dumping Rods can be turned end for end, and also interchanged, giving four wears instead of only one.

The Trip Casting, against which the Dump Rod Casting strikes to drop the Teeth, is adjustable to accommodate the height of the dump to heavy or light hay; its action is exactly the same whether turning a corner or raking straight ahead. In all cases the teeth drop closely behind the windrow. In driving a fast walking horse on an ordinary rake, the teeth do not drop quick enough, thereby leaving a strip of unraked hay. You can adjust this difficulty on the No. 4 All Steel Rake to suit the horse (fast or slow).

Another Point. It is possible without wrench or hammer to change the raking position of the Teeth, as it is desirable sometimes to run them higher from the ground. For instance, they should not run as close over wet and boggy ground as over a smooth, dry meadow. Simply by changing the connection, any position of the Teeth can be secured.

In every part it is light, strong and durable, and in case of operation and capacity for work, it has no equal.

Sizes: 8 feet, 26 teeth.
9 feet, 29 teeth.
10 feet, 32 teeth.

The PETER HAMILTON COMPANY LIMITED

The Peter Hamilton Elastic Cultivator

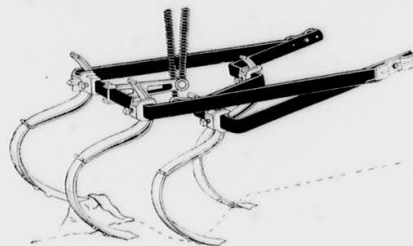

This is the famous Peter Hamilton Cultivator, universally recognized as absolutely the best designed, best built, best working Cultivator ever manufactured. It makes no difference what kind of cultivating you wish to do—preparing the ground for seeding in the Spring, or exterminating weeds later in the season; it makes no difference whether your ground is hard to work or easy, the Peter Hamilton Cultivator is there all the time, to do better work and more of it; a means to enable you to grow bigger crops, to increase production, and make more money for you.

Of course there must be reasons why this Cultivator is better than any other, and they are in brief as follows:—

The Frame is strong—properly braced and trussed so that it can neither be pulled out of shape, or sag down in the middle. The Axle extends the entire width of the machine, which not only helps to strengthen the frame, but also keeps the wheels in alignment.

8

The PETER HAMILTON COMPANY LIMITED

This cut shows the details of the sections to which the teeth are attached. You see, instead of having the different sections of teeth attached to one solid frame we have provided two frames, which give the teeth more independent action. All three rows cultivate to an even depth, and to the depth that you want to cultivate, instead of the back teeth going deeper than the front teeth. Furthermore, having so many sections gives the teeth more freedom of action, so that if one tooth catches on a stone or root only two or three are jerked out of the ground instead of one-third or one-half of the teeth in the machine. In hard or rough ground this feature will be especially appreciated. A ridge and a dead furrow can be cultivated at the same time, because more or less pressure can be applied to any section of teeth as desired.

The Teeth are made from an extra high grade of steel, and are very strong and reinforced with our patented helpers, which never come loose.

The Points are reversible, giving double wear.

The Teeth are divided into three rows, so that there is no danger of clogging. The Teeth are attached to the sections by a steel clip, and permits the setting of the points ahead or behind as desired for different kinds of land. This clip has a bulldog grip, which never gives up.

The 13 Tooth Cultivator has 6 Sections of Teeth.

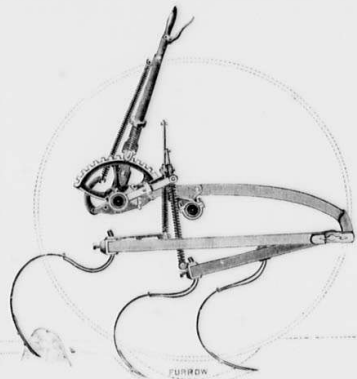

The 17 Tooth Cultivator has 8 Sections of Teeth.

POOR COPY

This cut shows the Lifting Lever, Lift Spring, and the method of applying the pressure to the different sections of the teeth. The Lift Spring works both ways, helps to raise the teeth, and also helps to force them into the ground. The lever is easily worked from either the seat or the ground, and gives absolute control over the machine.

The Pole can be adjusted to suit different sizes of horses, and can easily be changed from the centre to one side for three horses, and can be removed for storing.

The Draw Clevis is adjustable. That is, it can be moved up or down to suit the different conditions and different widths.

This Cultivator is also the best Weed Cutter that you can get, and for this purpose extra wide steels to replace the reversible points are provided, if ordered.

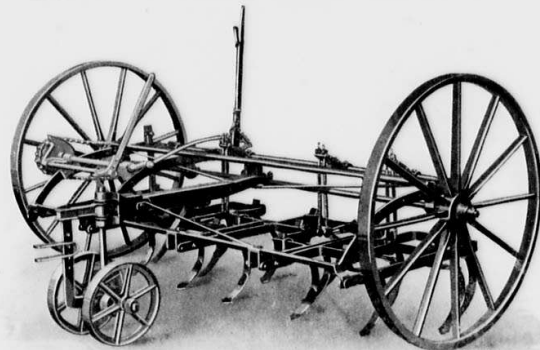

High wheels and wide tires and a comfortable seat help to make this Cultivator a pleasure to operate.

Grain and Grass Boxes for Spring Tooth Cultivator

Boxes for sowing all kinds of Grain and Grass Seeds can be supplied for both 13 Tooth and 17 Tooth Cultivators. The Feed is positive any any desired amount can be sown to the acre.

This Combination makes an ideal Combined Cultivator and Broadcast Seeder.

Cultivator with Tractor Attachment

Our 17 Spring Tooth Cultivator is equipped with Forecarriage and Self Lift for use with a Tractor.

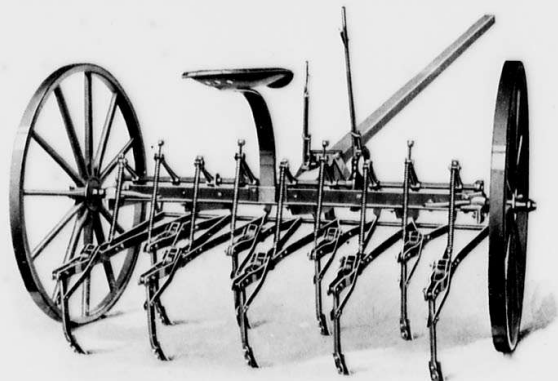

Simply hitch your Tractor to the clevis on the Forecarriage, and a Cord from the Tractor Seat to the Lift Lever and you are ready for rapid work. By merely pulling the Cord, the Teeth are raised clear or forced down to any desired depth in the ground.

POOR COPY

The New Peter Hamilton Stiff Tooth Cultivator

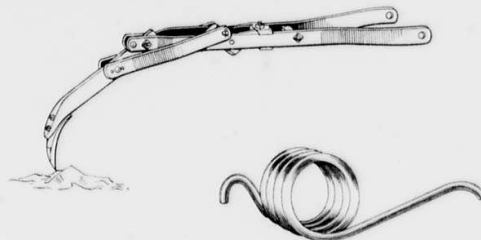

The Peter Hamilton Stiff Tooth Cultivator will successfully operate in all kinds and conditions of soil, from the very softest to the very hardest, no matter how dry.

It is the greatest Weed Killer on the market, and on summer fallow surpasses any other implement that can be put to work. If you wish to clean your farm of weeds, and at the same time work for big crops, be sure and use the Peter Hamilton Stiff Tooth Cultivator.

This Cultivator is substantially built to stand the work that it is expected to do, no matter how deep you want to cultivate, or what horses you want to put in front of it. The Frame is thoroughly braced and trussed, no danger of twisting or sagging. A lever is provided on the pole whereby the pole can be instantly set up or down to suit the different heights of horses, or to change the angle of the machine.

12

This cut of the detail of the drag bar shows the foot tripped back after having caught on a stone or root. After the obstacle is passed it flies back automatically into place again. Notice how strong and rigid the drag bars are, and also that there are no springs or other projections on the underside to catch and drag weeds and grass.

The Relief Spring is the most successful yet used on this kind of Cultivator, and holds the foot steady, except when it catches, and then it always brings the foot back into place. There is no danger of it catching. The Wedge can be adjusted to allow the relief spring to trip easier, or hold more rigid, as required. This trip is all steel, no castings to break.

The Foot can be set forward so that it will work itself into the hardest land, or it can be set back for shallow cultivation. You can cultivate just as deep or just as shallow as you like.

Any width of Thistle or Weed Cutters required can be supplied, including 2-in., 4-in., 7-in., and 10-in. More than one set with the machine will be charged for extra.

Two sizes—9 Teeth and 13 Teeth.

POOR COPY

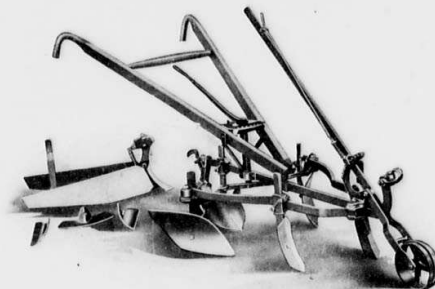

The Peter Hamilton Orchard Cultivator

This Cultivator is an ideal tool for working up to, and under fruit trees of all descriptions. It is low and the wheels are set inside the frame, so that there is no danger of taking the bark off the trees. It is built with nine teeth, but extensions can be added to both sides, giving either eleven or thirteen teeth as required. The teeth are in three rows and provided with Reversible Points and Helpers. Thistle Cutters or wide points can also be used. This Cultivator will do excellent work in the field or elsewhere, although it is not intended to cultivate as deep as the ordinary field Cultivator. The pole can be adjusted to suit the different heights of horses.

14

The Comet Scuffler

The Comet Scuffler is not a flimsy scuffler; it is a real horse tool in every sense. The frame is strong and well fastened together so that it is rigid even when expanded to the extreme limit. It will not bend out of shape, and allow the scuffler to run sideways. Provided with an adjustable wheel at both back and front to regulate the depth. The clips which fasten the teeth to the frame are malleable iron, and the teeth can be adjusted into any desired position.

The Back Hillers or Weeders can be turned half-way round, or inside out to cut away from the plants if desired; this saves following with a hoe to complete the work.

The Comet Scuffler can be instantly opened to cultivate a space 3 feet wide, or it can be narrowed until the outside teeth are practically together.

This Scuffler is usually sent out with the steels shown, with the exception of the Long Hills, which must be ordered extra, but we will furnish any arrangements of steels which may be required.

The Gem Clip Seed Harrow

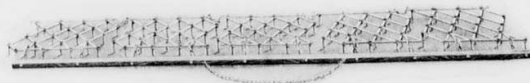

This is the most substantial Harrow on the market to-day.

The Clip you will note consists of three malleable parts securely held in place by a staple and two nuts. This Clip when tightened up has a bulldog grip practically everlasting, holding the frame rigid and the teeth in place, but when necessary can be loosened, the teeth taken out and sharpened, and put together again good as new. The Teeth are long and will stand repeated sharpening. Each section is three feet wide and has 15 teeth. As many sections as are desired can be attached together to make a complete Harrow.

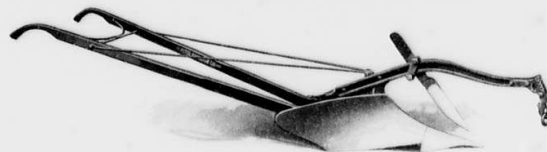

The "Channel" Harrow

The Frame of this Harrow is made of Channel Steel, into which the teeth are bolted. This is recommended for lighter lands than the Clip Harrow.

Each section is three feet wide and contains 20 teeth. As many sections as desired may be added to make a complete harrow.

Hamilton's Combination Plow

This Combination Plow is undoubtedly the best general purpose plow made, especially designed for all who require a Plow to do good work in clay, hard, gravelly or stony soils.

It is somewhat heavier and consequently stronger than the usual run of Plows. It is, however, very light of draft, steady running and light to handle.

An extraordinary stiff steel beam with heavy soft centre Steel Moldboards perfectly chilled, adjustable clevis, and good long handles guarantee perfect satisfaction in every respect.

Hamilton's I-X-L Plow

Our I-X-L is similar to the Combination Plow, only it is slightly different in satisfaction of the Mould-board. This Plow has for many years given universal satisfaction for general purposes or for sod ploughing; it turns a furrow of from seven to nine inches, and does its work well in every sense. It is fitted with Steel Beam and soft-centre American Steel Moldboards (specially hardened) and adjustable Clevis, which permits of rapid change from stationary to swinging, or the reverse.

Wide and narrow Plow Shares can be supplied for either of these plows. Our Plows do the work the way you want it.

No. 21 Plow

This Plow is one of the most generally used Plows in Ontario for general work. It is light in draft and runs level on the bottom. Is very easy to handle and makes a very handy Plow for a young boy to work with. Is fitted with the best American soft-centre steel Moldboard, which is extra hardened, and guaranteed to clean in any kind of soil. Has steel Beam and Land-slide. We supply them with Coulter Wheel and Skimmer, as desired.

No. 4 General Purpose Plow

An all-round General Purpose Plow of medium width, steel Beam, soft-centre steel Moldboard specially hardened; very light and convenient, and suitable for a boy. This Plow is fitted with adjustable Clevis. Wide and Narrow Plow Shares can be supplied for the above Plows.

No. 8, Sod or General Purpose Plow

Particularly adapted for heavy land; turns a furrow from 6 to 9 inches deep, and from 8 to 10 inches wide; weighs about 150 pounds; is suitable for two or three horses. Will clean in any soil, and is of very light draft. Handles, medium length. The head and general set of the Plow makes it easy to hold. It has steel Beam and Coulter.

**The Peter Hamilton No. 7
Tornado Ensilage Cutter and Blower**

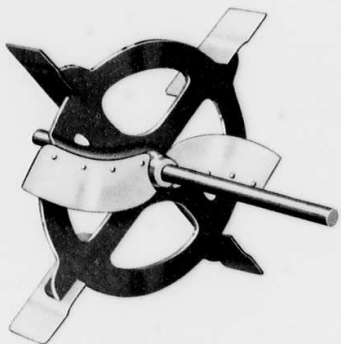

Combines all the latest ideas and improvements in Corn Cutting Machinery, and at the same time eliminating all the disadvantages and dangers often attached to these machines. Throughout it is scientifically constructed so as to handle the largest quantities of Corn, in the least time, and with the least requirements of power.

The Frame is built of selected Canadian Maple, thoroughly dried, mortised and tenoned together so that it is eternally rigid.

The Blower Case is constructed of high carbon steel, sufficiently thick and hard to withstand the tremendous wear which goes on the inside of a Blower Case. It is extra well riveted together, and securely held in place.

The Knife Wheel is a Solid Steel Casting, not grey iron, or mild steel, but real steel, and there is no possible chance of this knife wheel flying to pieces from excessive speed. The Tornado is a "Safety First" machine in every respect. The Knife is securely keyed on a Cold Rolled Shaft 1 3/4 inches in diameter.

The Knives are of high grade steel and very heavy, but at the same time not too stiff to be properly adjusted to the cutting plate. This adjustment is made by means of set screws provided with a lock nut preventing it coming loose. This fine adjustment not only allows this machine to successfully cut corn, but also straw and hay as well.

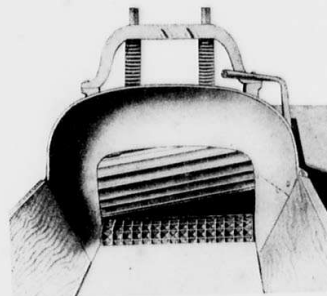

These set screws do not simply screw into the casting, but are provided with a nut on each side.

20

The fans are constructed of steel riveted on to the drum with hot rivets so that there is absolutely no danger of them coming loose. They are so placed that besides creating a strong current of air they also throw the corn with tremendous force up the pipe.

The mouth piece is enlarged at the opening so as to gather in the corn, thus increasing its capacity to a great extent.

The Bottom Roller is toothed, and the Top Roller corrugated, and will everlastingly pull the corn in, no matter how it is fed to it, or in what shape it is, and holds it tightly while cutting it.

The Top Roller is provided with two pressure springs close to the end which exerts a constant pressure on the top roller. This Top Roller is self-conforming in accordance with even or uneven feeding. It can be higher or lower at either end if there should happen to be more or less corn at either side of the mouth piece, and at the same time runs perfectly free.

The Main Shaft Bearings are large babbbitted boxes fitted with hard oil cups. The Gears throughout are extra heavy and cannot break.

21

Indian Affairs (RG 10 Volume 6470, file 890-5, part 2)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

POOR COPY

The Reverse Gear is on a slow running Counter Shaft so that no matter how fast the machine is running it can be reversed without damaging the Reverse Gear in the slightest.

The sides of the Travelling Feed Table can be taken off and the travelling feed table folded up for transportation. The extra feed table can be placed on either side of the travelling feed table as required.

POWER.—The power required depends to some extent on how hard the machine is fed and the height to which the corn is to be elevated. A 14 H.P. Steam Engine makes an ideal power. We have, however, successfully run this machine with a 12 H.P. Gas Engine.

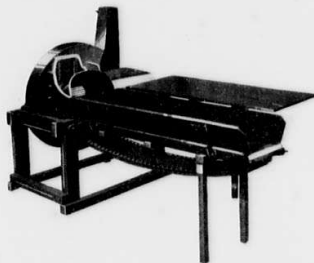

CAPACITY.—Capacities differ to a great extent, according to conditions, of both power and corn. Our experience has been, however, that it is easy to cut from eight to ten tons per hour, when the corn is cut $\frac{5}{8}$ inch long.

The Pipes are constructed of heavy sheet steel, and the deflector is strongly built.

When these machines are ordered we usually supply one extra set of knives, one pulley, lagged, and thirty feet of pipe. If any different equipment is required it should be mentioned in the order.

Cuts— $\frac{3}{4}$ inch, $\frac{5}{8}$ inch—1 inch and $1\frac{1}{2}$ inches.

The Mouth is 12 inches wide and raises 5 inches.

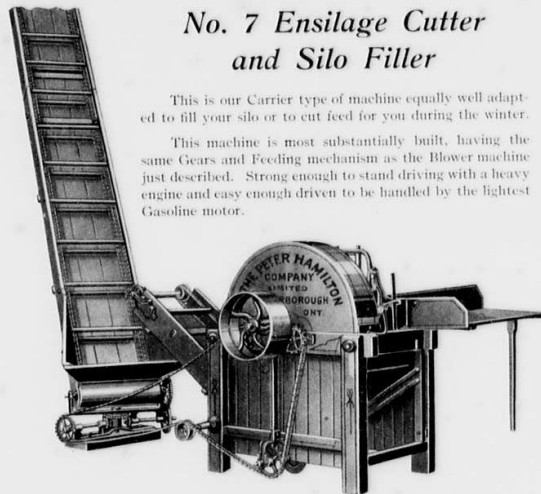

22

No. 7 Ensilage Cutter and Silo Filler

This is our Carrier type of machine equally well adapted to fill your silo or to cut feed for you during the winter.

This machine is most substantially built, having the same Gears and Feeding mechanism as the Blower machine just described. Strong enough to stand driving with a heavy engine and easy enough driven to be handled by the lightest Gasoline motor.

The Knives are manufactured out of an extra high-grade of Steel and are guaranteed to stand up to their work. They are easily adjusted up to the Cutting Plate. These Knives are concave-shaped, cutting from the outside rim towards the centre with a shearing cut all the way across, giving you full value of the momentum of the wheel on every cut.

The material is clean cut, no chopping or long ends.

When a light power is available this scheme makes an ideal Silo Filler. It cuts corn perfectly, leaving stalks and cobs all the same lengths. Carriers deliver it into the Silo in a very satisfactory manner. Of course you cannot cut as much as with a Blower, but you do not need as much help as with a Blower.

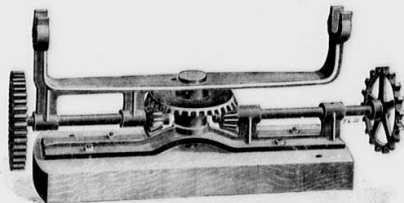

23

Indian Affairs (RG 10 Volume 6470, file 890-5, part 2)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

POOR COPY

The Elevating Carriers are very strongly constructed, have extra deep sides, and the Chains return on top. This prevents the cut stuff from blowing out and eliminates a litter underneath the Carriers.

Universal Jack

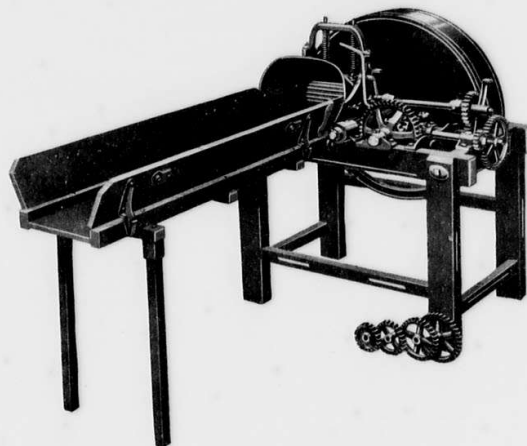

These Carriers can be mounted on a stand when it is only desired that they run straight out from the machine, but a Universal Jack can be supplied which will enable the Carriers to be swung around to any direction within a radius of a half circle.

This machine can be supplied with either a Plain Feed Table or a Travelling Feed Table.

With the Travelling Feed Table, the capacity of the machine is not only increased but the work of feeding is considerably reduced.

The No. 7 Straw Cutter

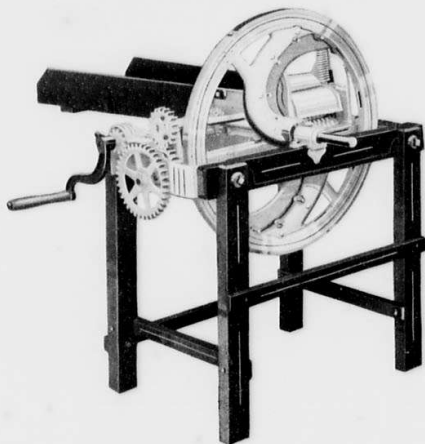

This machine is specially built for cutting large quantities of Straw or Corn in the barn for winter feeding.

It is similar throughout to the No. 7 Ensilage Cutter, but the Carriers have been eliminated. Any small gasoline engine will drive it most satisfactorily.

Any PETER HAMILTON FEED CUTTER will repay you many times its cost because it will prepare your fodder in excellent shape. Every Straw cut into short lengths, no loose ends.

We have a machine for every purpose.

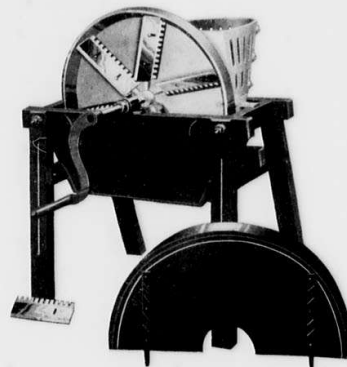

The No. 6 Straw Cutter

This Machine has a 9-inch mouth and the rollers raise about $2\frac{1}{2}$ inches. It can be operated by hand or by a small gas engine. The Frame is rigid and the machine parts strongly constructed. The Fly Wheel is heavy, perfectly balanced and mounted on Roller Bearings. The Knife has a concave cutting edge, giving a shearing cut from the outside towards the centre. There are no ends pushed out uncut. The sharp toothed roller makes feeding very easy, and the constant pressure on these rollers hold the stuff firmly until it is cut. It takes but little power to run one of these machines.

26

Hamilton's Root Pulper, No. 3

This is a perfect machine, made with reversible knives, which can be used for slicing. The Knife Wheel has a very heavy rim, which acts as a fly wheel, and make the work of cutting easy.

The Hopper is the very best for feeding the roots to the head. It makes the roots feed regularly and smoothly, without clogging or choking, and does its work with great rapidity.

The Boxes are supplied with Anti-friction Roller Bearings of the best construction, an improvement which is very much appreciated by all who value ease of operation.

Feeding Table can be set at either side of machine.
Safety Control Lever operated as easily from one
side as the other.

Massey-Harris No. 3 Blizzard Ensilage Cutter

With transport truck and feeding table in position. It can be furnished without the truck if so desired, and either with a fluted upper roller and a smooth lower one, as here shown, or with the toothed rollers shown in following illustrations, as may be preferred. The transport truck wheels are 20 in. high with 3-in. face.

SPECIFICATIONS OF MACHINE

Throat 12 in.; Pipe 7½ in.; Pulley 10, 12, 14 or 16 in. as specified; Speed required 800 to 1000 r.p.m.; Power required 12 to 15 H.P. for ordinary conditions or 20 H.P. for very heavy work; Lengths of Cut ¾ in., 1 in., 1½ in., 2 in.; Capacity 6 to 12 tons per hour depending on condition of corn, length of cut, etc. Some operators cut greatly in excess of these amounts. Equipment: 2 Extra Knives, 1 8-ft Length Bottom Pipe, 2 Deflector Elbows, 1 Feed Table.

Cutting Ensilage to Advantage with the No. 3 Blizzard

Corn or Sunflowers

THE Massey-Harris No. 3 Blizzard Ensilage Cutter will handle corn or sun flowers with equal facility. It is ideal for personal or custom use. The No. 3 Blizzard is as safe a machine to operate as it is possible to make.

Safety Features

The control lever is a safety lever which can be operated from either side of the machine. When the Blizzard is cutting, this lever is at its extreme forward position. A push against it will cause the feed rolls and travelling bed to stop or reverse. The gears are covered by shields which can be removed without disturbing a bolt or a nut.

Juice-Tight Blower Case

The blower case of the No. 3 Blizzard is dust-proof, water-tight and juice-tight. It is extra heavy and is well reinforced with ribs.

Strong Cutting Head

The knife on head mechanism does two operations at once. It cuts the ensilage and throws and blows it to the silo. Four smoothed surface fans provide plenty of power to carry the silage to the top of any silo under ordinary conditions.

Convenient Grinder

A power grinder controlled by a separate clutch is part of every machine. On it one set of knives may be sharpened, while the other is in use.

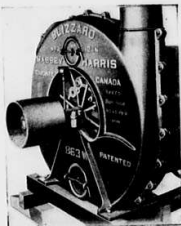

Ask Your Local Agent For Full Particulars

Strong, heavy, carefully balanced head gives the effect of a fly-wheel.

A power grinder, controlled by separate clutch, is part of every machine.

Extra heavy, well reinforced blower case.

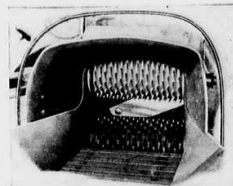

Each knife can be adjusted in its relation to the shearing plate, independently of the other by turning segments "B" one or two cogs in the right direction.

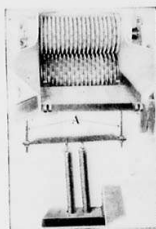

Knives are strong, well tempered and keen cutters. An extra set goes with each machine.

Feeding table can be set on either side of the machine.

Control lever is as easily operated from one side as the other. Note how upper roller rises to accommodate varying volumes of feed.

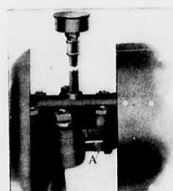

Two strong springs exert tension on upper roller.

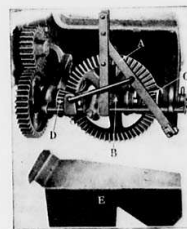

Spring controlled clutches.

Gears for obtaining four different cutting lengths: $\frac{1}{4}$ in., $\frac{1}{2}$ in., $\frac{3}{4}$ in. and $1\frac{1}{2}$ in.

The two long, well-babbitted main shaft bearings have a compression grease cup.

Gears and shield. The latter can be put on or taken off without disturbing a bolt or nut.

The Man with the Silo has The Advantage

THE cost of feeding the animals is the greatest expense connected with the livestock and dairy businesses. Experiments conducted by experimental farms over a period of fifteen years have proven silage to be the most economic food for the production of stock and stock products.

During a very severe winter experienced in Western Canada recently, cattle starved to death on the ranges. Hay was hard to get even at ridiculously high prices. Many Western Canada farmers are now erecting silos as insurance against a repetition of such conditions.

Eight times more feed can be stored in the silo than in the mow. A silo saves in storage space. Silage can be carried over from one season to another for several years and still be fed at a profit.

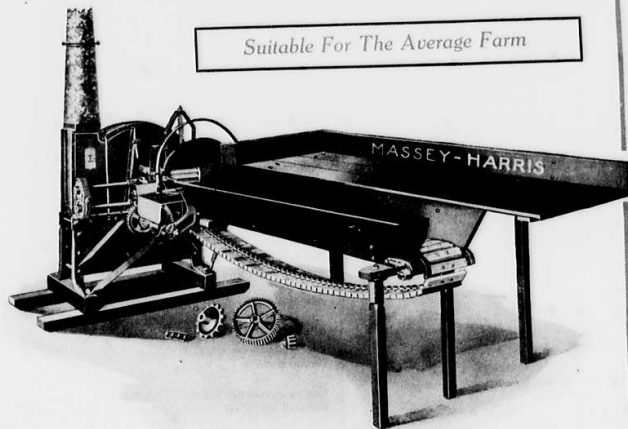

Silage is a succulent, grass-like feed, easily digested, and seems to stimulate digestion. Less sickness is experienced among the stock when silage is fed. Silage stimulates the milk flow, and all milking stock should have it.

Corn silage is the cheapest source of the principal element required by cattle, i.e., digestible carbohydrates. The man with the silo has the advantage over his neighbor without one.

Massey-Harris No. 5 Ensilage Cutter

For Use with 6 to 10 H.P. Engines

Suitable For The Average Farm

SPECIFICATIONS

Throat - 9 in., Pipe - 6 in., Pulley - 7 x 8 in.; Lengths of cut - $\frac{1}{2}$ in., $\frac{3}{4}$ in., $1\frac{1}{2}$ in. and $1\frac{3}{4}$ in.; Speed Required - 900 to 1100 r.p.m.; Power Required - 6 to 10 h.p. for ordinary conditions; Capacity - 3 to 8 tons per hour depending on the condition of the forage, length of cut, power available, etc.; Equipment - 2 Extra Knives, 1 24" Length, Bottom Pipe, 2 Deflector Elbows, 1 Feed Table. Pulleys with an 8 in. face of 10 in., 12 in., or 14 in. diameters are supplied as extras when ordered. Supplied with Transport Truck if so desired.

THE Massey-Harris No. 5 Ensilage Cutter is built on the same general principles as the No. 3 Blizzard, but is smaller and is suitable for ensilage cutting on most farms. For ordinary conditions 6 to 10 h.p. will operate this machine satisfactorily.

Safe to Use

This is a safe machine to operate. The control lever acts as a safety lever and all gears are covered by shields which can be removed easily when necessary.

Carefully Balanced Head

The head is strong and heavy, is carefully

balanced and is provided with six steel blades which furnish the blower fan. It gives the effect of a flywheel, runs steadily, drives the knives with tremendous force, and both throws and blows the ensilage with sufficient force to carry it to the top of the high silos.

Other Superior Features

The adjustments are easily made and accessible; reversible feeding table; the gears are held in perfect mesh and alignment; it gives the most work for the h.p. supplied; the spring-controlled rollers accommodate themselves to varying volumes of feed.

Massey-Harris No. 9 Cutter

Hand Use Only

THIS cutter, like the No. 10, is built substantially, but it is intended for smaller work, being strictly a hand machine. It is not quite so compact, as its table is built as an integral part of the frame. A space of 36 x 38 inches is required for it. It has a hardwood frame, well braced and bolted, and is operated by a crank at the side. However, it can also be made to operate from the end by simply taking the handle from the crank and bolting it to the fly wheel. The table is 36 inches over all in length, has a 12-inch mouth and a $7\frac{3}{4}$ inch throat. The feed rolls and cutting mechanism are very similar to those of the No. 10, only of course they have been modified as necessary to fit the size. The spring controlling feature of the rolls and the adjustable features of the curved knives are provided. The rolls, however, instead of being driven through tumbling

rods with knuckle joints, on this cutter, are driven by means of a worm and lug wheel which are placed in such relation one to the other that there is no binding of either when the upper roller rises to accommodate the different thicknesses of feed. The knife or fly wheel is of about the same diameter as the one used on the No. 10, but it is of lighter weight. A guard prevents the operator from coming in contact with the knives. The frame is so constructed that a box or basket may be placed to catch the feed.

Full Particulars From Your Local Agent

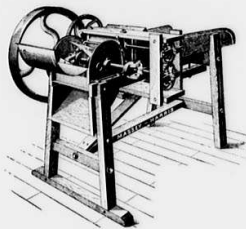

Massey-Harris Cummings Cutter

Hand or Power

THIS is a combination hand and power machine and can be fitted with knuckle or 10 in. x $4\frac{1}{2}$ in. pulley as desired.

It has a substantial hardwood frame, roller bearings, a heavy fly wheel, and four spiral knives which are mounted in such manner as to be readily adjusted or removed for sharpening.

Gear-driven feed rolls, which automatically conform to varying amounts of straw or other material, give positive feed at all times. The cut can be changed by means of different gears to various lengths as follows: - $\frac{3}{8}$, $\frac{1}{2}$, $\frac{3}{4}$, $1\frac{1}{4}$, $1\frac{3}{4}$ or $2\frac{1}{4}$ in. The throat is 9 in. in width.

Indian Affairs (RG 10 Volume 6470, file 890-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

Massey-Harris No. 10 Straw Cutter

Hand or Power. Has 9-inch throat and will cut feed either $\frac{3}{8}$ or 1-inch in length. Furnished with 10-inch pulley and crank.

Only a small space is required for it as the table is hinged at two points "A" and can be easily folded out of the way. With the table folded and the cranks off, it takes only 36 x 29 in. floor space.

The frame is solid and substantial. It is made up of hardwood pieces, mortised to fit one another closely, and two cast sills.

➤ This Handy Machine requires little space

CUT straw used for bedding will take up and hold a larger percentage of the fertilizing element than uncut straw. Also, the spreader handles manure saved this way easily and spreads it more evenly.

Straw can be best prepared or used for feed purposes when it is cut, and the No. 10 Straw Cutter that can be operated by hand or power is a very handy machine to have around the place.

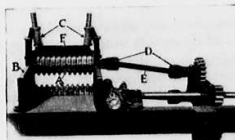

The Massey-Harris No. 10 Straw Cutter takes up little space when in operation and less when not, as the table is hinged and can be folded up out of the way.

Curved knives of saw steel, each of which is fastened to the wheel by four bolts, do the cutting. They can be adjusted for wear and close shearing by set screws, of which there are five for each knife. The knives can be ground back almost two inches before they need to be replaced.

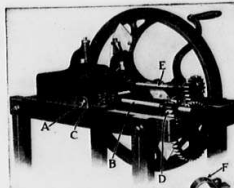

The wheel to which the knives are bolted, weighs 75 lbs. and is mounted with roller bearings at each end of its shaft.

For full particulars ask your local agent.

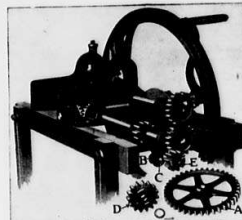

Every Massey-Harris Agency is a Service Station

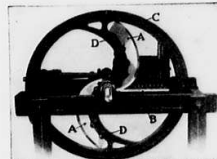

Upper feed roll rises to accommodate varying volumes of feed, and is controlled by two springs "C."

Gears are all held in positive alignment by the substantial frame.

Gears are easy to get at and can be changed quickly.

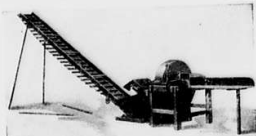

Curved knives of saw steel do the cutting.

Indian Affairs (RG 10 Volume 6470, file 890-5, part 2)

ARCHIVES PUBLIQUES
CANADA

POOR COPY

Massey-Harris No. 2 Straw and Ensilage Cutter

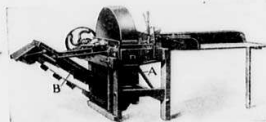

Carrier may be set to deliver back of the machine.

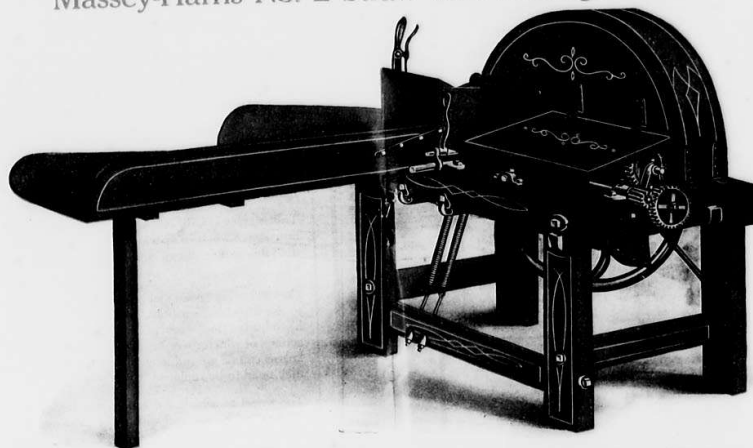

Carrier may be set to deliver to the right or left of the cutter.

Levers are easy to get at.

Cutter equipped with under-box "A" and short carrier "B."

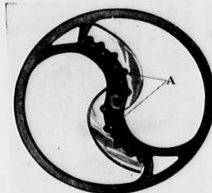

THIS is a durable machine of large capacity, 12-inch throat. It can be furnished as a plain straw cutter as here shown, as an ensilage cutter with both short and long carriers, or as a cutter with under box and short carrier. The long carriers are furnished in different lengths. When used as a plain cutter it can be operated with a Massey-Harris 3 H.P. Gas Engine; when used with carrier not exceeding 24 feet, a $4\frac{1}{2}$ h.p. engine is required, and when used with a longer carrier, one of 6 h.p. or even 8 h.p. would be advisable. The table is open at side and end to facilitate feeding. Operator feeds to his right, the natural way; and the control lever and the carrier gear shifter lever are conveniently placed. Because of the substantial frame which holds them in line, all of the gears mesh well, and run freely. Friction is reduced by the use of rollers in cages at the principal bearings. The feed rolls are adjustable. The upper roll will rise automatically to accommodate any forage up to 5 inches in thickness. Six lengths of cut are possible, $7/16$ inches, $5/8$ inches, $7/8$ inches, $1\frac{1}{2}$ inches, $2\frac{1}{16}$ inches and 3 inches, by means of three sets of gears which are quickly and easily changed. Two semicircular knives mounted on a 38 in. wheel, weighing 110 pounds, do the cutting. The large diameter of the wheel, combined with its weight, gives it a momentum which carries the knives through anything that is likely to be fed between the rollers.

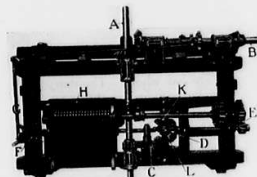

It Is Important To Remember Massey-Harris Service—It Counts

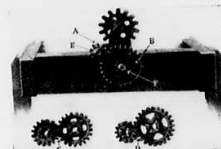

Working parts are well shielded.

Two semi-circular knives mounted on a 38 in. wheel, weighing 110 lbs. do the cutting.

All gears mesh well and run freely.

Gears for obtaining six cutting lengths of $7/16$ in., $5/8$ in., $7/8$ in., $1\frac{1}{2}$ in., $2\frac{1}{16}$ in. and 3 in.

POOR COPY

No. 2 Pulper

Side Wheel Type

ROLLER bearings in cages are used at each side of the No. 2 Pulper to make the machine run easily.

Each knife has both a slicing and a pulping edge and slotted adjustments are provided for taking up the wear.

The frame is strong, solid and well-braced. Both the No. 2 and the No. 1 Pulpers will give long and satisfactory service.

No. 1 Pulper

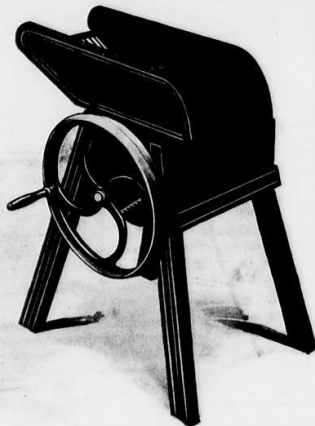

Concave Cylinder Type

WHEN put through a pulper, roots are fed to the best advantage, as little or no waste results, as does when roots are fed whole. The dairy farmer especially benefits by the use of these machines in preparing roots for feeding purposes.

Like the No. 2, the knives on the No. 1 Pulper have both a slicing and pulping edge and are provided with slotted adjustments for taking up wear.

The No. 1 Pulper may be turned by hand or driven by power from either the right or left as desired. Roller bearings in cages are used in the axle boxes to minimize friction and scrapers are provided to keep the pulp from lodging in the cylinder.

Use a Pulper and Prevent Waste

Massey-Harris Grinder

Three Styles—Seven Sizes

Furnished with or without Bagger Attachment

Large capacity is a feature of the hopper. The flow of the feed from it is regulated by the slide which, here, is shown at its extreme upward position.

The flow of the grain to the grinding mechanism can be regulated to a nicety by turning the knob out here shown which adjusts the pitch of the feed spout.

This coarse sieve in the feed spout carries off straws and other similar foreign substances.

A Size and Style For Every Purpose

A GRINDER on your farm would save the hauling and extra cost involved in taking your grain to the mill to be ground into feed for your stock. During a slack season, if you have a grinder, there is the prospect of doing custom work for your neighbours, thereby making a little profit during a time when ordinarily there would be nothing coming in. Then, too, when you have a grinder on the place, you can grind the feed as you need it and coarse or fine whichever you require.

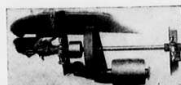

So that you will have no difficulty in choosing the one most suitable for your requirements, Massey-Harris Grinders are made in a variety of styles and sizes as shown in the table of dimensions on the following page. Any of them can be had with or without the bagger attachment, which is shown on the grinder in the illustration on the opposite page.

By referring to the cuts you will gain a pretty good idea of the care taken in the construction of the Massey-Harris Grinder to insure a machine that will do the most work with the minimum consumption of power, give good satisfaction, and stand up well under constant use.

On the following page we have listed a few of the outstanding features of Massey-Harris Grinders. Your local agent will gladly furnish you with full particulars upon request.

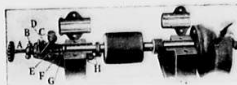

Beneath the coarse sieve there is a fine sieve. The feed is double cleaned and goes to the burrs free from foreign substances that may be injurious to the stock.

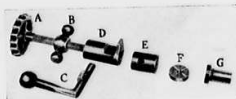

Shaker is driven direct from the main shaft by a belt and pulley which consumes very little power.

Self-aligning bearings lubricated by compression grease cups prevent the shaker shaft from binding.

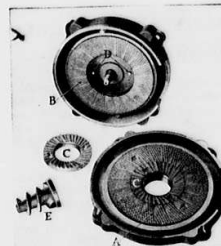

Long babbitted bearings keep the main shaft in line.

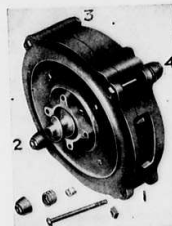

Detail of pressure screw and eccentric quick relief lever "C."

The shaft and pulleys are perfectly balanced.

The large currs are enclosed in casing.

Two compression springs at each of the four places keep stationary plate squared up with revolving one.

Burrs are cut and dressed on both sides and two extra ones go with each grinder.

Belt for bagger attachment can be tightened easily.

Spout can discharge into either of two bags.

A Few Outstanding Features of Massey-Harris Grinders

THE burrs are made of an especially hard mixture and are reversible, being cut and dressed both sides by special machinery—always in perfect trim.

The stationary burr is bolted to the cover of the housing by four bolts, each of which has two spiral springs, one within the other, to give flexibility.

A quick and positive adjustment is provided for setting the plates to grind fine or coarse, and patent quick-relief lever enables the operator to instantly stop or start the grinding without affecting the adjustment—once set, always set.

A safety break pin automatically relieves the burrs if any hard substance gets in.

The main shaft bearings are of ample size and well babbitted, and an improved friction block takes the end thrust.

The patent raising and lowering device for feed spout is a great improvement. Feed spout has two sieves, one for carrying off straws, stones, etc., the other for removing sand and dirt.

TABLE OF DIMENSIONS OF MASSEY-HARRIS GRINDERS

MASSEY-HARRIS COMPANY, Limited.

Toronto, Canada,
June 27th, 1923.

Purchasing Commission of Canada,

OTTAWA, CANADA.

Gentlemen:-

Quotation on #5 Ensilage Cutter, per
your telegram of 26th inst.

Yesterday afternoon we received your telegram asking for quotation by mail on our #5 Blower Ensilage Cutter delivered at Mission, B. C., with full particulars as to specifications, etc.. We are enclosing a copy of our special folder describing our line of feed cutting machinery, on page 4 of which you will find full information concerning our #5 Blower Ensilage Cutter. The description is so complete that there is nothing we can add other than to name prices. We have pleasure in quoting as follows:

#5 Blower Ensilage Cutter with 2' Bottom Pipe and Elbows.....	\$203.50)	
2' length ordinary pipe.....	1.55)	
4' " " " ".....	2.85)	F. O. B.
8' " " " ".....	5.25)	Mission,
Transport Truck.....	39.50)	B.C.
Hopper and Bale for Filler Pipe.....	3.60)	
2' length of Filler Pipe.....	1.65)	

The above prices are for cash and are special to the Department. If the machines are required for other than departmental use it is necessary to pay Sales Tax, this tax will require to be in addition to the above prices.

Our records show that we have four of these machines on hand with our Calgary Branch at the present time, so that we are in a position to make prompt shipment.

Yours truly,

MASSEY-HARRIS CO., LIMITED.

The Purchasing Commission of Canada,
Ottawa, Ont.

Gentlemen:-

We are in receipt of your telegram of the 22nd as follows, "Please advise your best price by mail on one Ensilage Cutter delivered, Mission, B. C. similar to Massey-Harris Co., number five or equal, full particulars desired.

The Massey-Harris No. 5 is a 9" Blower type of Cutter, we do not make a 9" but we do make a 10" machine, precisely the same as the No. 7 or 12" machine, which you will find described in this catalogue. This is a splendid machine in every particular, there is nothing better made, and one of them we know will answer your requirements in an admirable manner. We will be glad to deliver one of these machines for you at Mission B.C. for \$225.00. The price quoted covers the machine complete with 30 ft. of pipe, deflector for top, extra set of knives, and mounted on four wheels as illustrated. This is the only way we have them in stock at the present time.

Yours truly

THE PETER HAMILTON CO., LIMITED

(sgd) James Hamilton.

PRICES SUBJECT TO CHANGE WITHOUT NOTICE. AGREEMENTS SUBJECT TO STRIKES, ACCIDENTS, DELAYS OF CARRIER AND OTHER CAUSES BEYOND OUR CONTROL.

Gentlemen:-

Your telegram of the 26th to hand, and under separate cover we are sending you copy of our general catalogue, pages 10 to 17 of which illustrate and describe our line of Silo Fillers.

We would refer you particularly to the guarantee, which will probably give you a better idea than anything we could say of the exceptional performance of the Gilson Silo Filler. This guarantee is shown on page 17.

It is unquestionably the broadest guarantee ever made and the fact that we have been manufacturing Silo Fillers in Canada for many years and have built up what is probably the largest Silo Filler business in Canada will indicate that our machine yields exceptional service and performance.

We are not positive of the capacity of the No. 5 Massey-Harris box but our 13" machine, which is the most popular size we make, is in use at one of the Government Experimental Farms in British Columbia and in Prince Edward Island. When furnished with third roller it is particularly adapted for handling loose fodder, such as oats, peas and vetches, sweet clover, etc.

Our 13" two knife Silo Filler on truck with standard equipment, including extra set of knives, tools, elbow for top of pipe, sufficient pipe for 36 foot silo, etc. would cost you \$340.00 delivered at Mission, B.C. *third roller,*

This machine operates at a slower speed than any other Silo Filler, insuring safety and the greatest economy of power. The faster a machine runs the more dangerous it is and the more power it consumes. Our 13" machine operates at a minimum of 600 RPM. It is equipped with safety reverse which can be operated from either side of the table,--three lengths of cut,--six fans and small pipe. The advantage of the six fans and small pipe is that with six fans it is delivered in a steady stream to the pipe, not in bunches. The air blast being concentrated in a 6" pipe insures the greatest lifting power with less air, thus enabling the machine to operate slower.

Sir:

Referring to your letter of the 18th ultimo, regarding the supplying of a blower cutter and gas engine to be used in connection with the silo at the new barn for the St. Mary's Mission Indian Boarding School, I beg to confirm the following day letter sent you, of yesterday's date: -

"Reference your one eight A of eighteenth ultimo. You are authorized to purchase Alpha eight horse power gas engine from the DeLaval Company, Vancouver, after securing their lowest price. Department has ordered a Massey-Harris ensilage cutter and blower which will be shipped immediately from Calgary."

We have placed an order with the Massey-Harris Company, Toronto, to have shipped from their agency at Calgary one of their No. 5 Blower Ensilage Cutters with 2' bottom pipe and elbows, also the following attachments:

2' length ordinary pipe,
4' " " "
8' " " "
transport truck, hopper and bale for filler pipe,
2' length of filler pipe.

The price quoted is \$257.90, f. o. b. Mission, B. C. The above firm were requested to arrange for immediate shipment.

The Purchasing Commission of Canada would not authorize the purchase of the "FABEC" ensilage cutter, as this machinery is manufactured in the United States.

The Massey-Harris Company have been requested to forward to you their account in duplicate covering the cost of the ensilage cutter and attachments. Upon arrival of this equipment, you will be good enough to certify and send the account to the Department, in order that payment can be made.

As instructed by above telegram, you were to purchase an "Alpha" 8 horse power gas engine from the DeLaval Company, Vancouver, after you had secured their lowest price. You should also forward properly certified vouchers in duplicate, covering the cost of the engine.

We hope that, when this equipment arrives, it will be satisfactory in every respect.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

Gentlemen:

Attention Mr. R. W. Chisholm, Sales Manager.

I have to confirm the following day letter, of yesterday's date:-

"Reference your letter twenty-seventh ultimo to Purchasing Commission. Please telegraph your Calgary branch to ship without delay to St. Mary's Indian Boarding School, Mission, B. C., one number five blower ensilage cutter with fittings. Charge Department Indian Affairs."

As this equipment is required as soon as possible by the school authorities, I hope that there will be no delay in having it shipped from Calgary. This ensilage cutter, with all fittings, as per your letter to the Purchasing Commission of Canada, should be supplied f. o. b. Mission, B. C., at the price quoted, viz.: \$257.90. You will be good enough to forward your account, in duplicate, to Mr. A. O'M. Daunt, Indian Agent, New Westminster, B. C. He has been informed that the order was placed with you, and instructed to certify the accounts, when the ensilage cutter has been received, and send them to the Department for payment.

Your obedient servant,

J. D. McLEAN

Dear Sir:

#5 Ensilage Cutter for Mission, B.C.

We are pleased to acknowledge your telegram of to-day's date, in reply to our quotation dated June 27th addressed to the Purchasing Commission, ordering one #5 Blower Ensilage Cutter for delivery to the St. Mary's Indian Boarding School at Mission, B.C.

Your telegram orders this Blower to be complete with fittings, from which we presume you require a Transport Truck and Hopper and Bale, and also some extra pipe. We are unable, however, to know how much of this ordinary elevator pipe and how much filler pipe is required.

In view of the urgency of the matter we have wired our Calgary Branch as requested, and are asking them to get in touch with the head of the School at Mission and ascertain how much pipe is required. They are to fill the order, which can be done from their local stock, immediately on receipt of this information, and will then forward their invoice to the Department of Indian Affairs. We trust that this handling of the order will be satisfactory.

Yours very truly,

WBW/B

Gentlemen:

I have to acknowledge receipt of your letter of the 3rd instant, regarding the ensilage cutter required for delivery at Mission, B.C.

In reply I beg to say that the equipment we require is that specified in your quotation of the 27th ultimo, to the Purchasing Commission of Canada, as follows:

#5 Blower Ensilage Cutter with 2' Bottom Pipe
and Elbows,
2' Length Ordinary Pipe,
4' " " " "
8' " " " "
Transport Truck,
Hopper and Bale for Filler Pipe,
2' Length of Filler Pipe.

We note that you have wired your Calgary Branch to ascertain from the principal of the school the quantity of pipe required. We also note that your Branch at Calgary can fill the order from their local stock, when they are aware as to the requirements.

You should instruct them to forward their account to Mr. A. O'N. Daunt, Indian Agent, New Westminster, B.C., as requested in our letter to you of yesterday's date.

Yours truly,

Reverend Sir,-

The Department desires to proceed as soon as possible, with the erection of the new building which is required at St. Mary's Mission Indian School.

From correspondence on file, it appears that the new building is to give accommodation for the laundry, kitchen, pantry, dining rooms and school rooms, and I would ask you to please furnish me at your earliest convenience, with a rough sketch showing the accommodation that you will require, also full particulars as to the materials which could be used in the construction of this building.

As soon as this information is received, plans and specifications will be immediately prepared and tenders invited for the work.

R

Dear Sir:

I received your letter of August 28th, File 153-1-5, regarding the erection of new building which is required at St. Mary's Indian School.

Some two years ago, shortly after my appointment, I approached the Department about the matter. The Institution had then two kitchens, an old fashion laundry, etc. I wrote about very much needed changes and improvements. The Department was very kind. We have already a new barn.

Since then I find that the accommodations afforded by St. Mary's are not sufficient for the number of children of school age in the District; they are not sufficient for the number of applications I receive every year. This matter has been the subject of a great deal of consideration and discussion. The matter was discussed with Mr. Scott, Deputy Superintendent General of Indian Affairs, at the time of his visit to St. Mary's. After examining the buildings, Mr. Scott agrees with Father Welch and myself, that the best way and therefore the only way is the erection of a new School, large enough to accommodate all the children of the District. This new School is to be erected as soon as possible. Meantime I think that some amelioration in the laundry should be considered at once. The old fashion, back braking laundry of St. Mary's should be equipped with some modern and labor saving devices. I will write more fully on this matter within a few days.

Yours sincerely

J. A. Macpherson

TO DATE OF THIS LETTER

Sir,—

With reference to your letter dated the 26th of September last, File No. 153-1-1, I beg to forward you herewith Agency Voucher No. 481 for \$600.00, covering the amount authorized for refund to St. Mary's Mission School, on account of various alterations made to dormitories and classrooms there.

also sent to \$801.32
Receipts are also attached to the amount of \$801.32, showing that the expenditures incurred by the school Authorities are in excess of the grant allowed by the Department.

The increased accommodation so far as dormitories are concerned provides for twelve children in the large dormitory and nine in the smaller one, while the classroom gives additional capacity up to fifty, should this number be required at any time.

Additional classroom accommodation-----
24 x 36. Dormitories accommodations--- 45 x 14 - 12-----
30 x 16 - 8.

Your obedient servant,

for name noted 8 R.A.
A.O.N. Daunt.
Indian Agent.

Sir:

I have your telegram of the 6th instant, requesting authority to purchase twenty double desks for the use of the St. Mary's Mission Indian Residential School.

In reply I beg to say it is necessary that all desks be purchased by the Department, after competitive prices have been obtained. Before we can place an order, however, you should state the sizes of the desks required and the number of each size. Desks are manufactured in the following sizes: -

No. 1,	for adults,			
No. 2,	"	pupils	15 to 18 years,	
No. 3,	"	"	12 " 16 "	
No. 4,	"	"	9 " 14 "	
No. 5,	"	"	7 " 10 "	
No. 6,	"	"	5 " 8 "	

You should ascertain from the principal the number of each size required. Please state, also, the name of the manufacturer of the desks at present in use. You should wire, giving the information requested.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

Sir:

I have to acknowledge receipt of your telegram of the 12th instant, stating the number and sizes of the double desks required for the use of the St. Mary's Indian Residential School. It is now considered, in order to save time, that you should arrange for the purchase of these desks. It will be necessary, however, in accordance with the regulations of the Government Constacts Supervision Committee, that competitive prices be obtained and the purchase, made from the firm quoting the lowest price. You should obtain prices from the following firms, besides any others you may wish: -

J. D. Meekison, 1142 Homer St., Vancouver, B. C.,
E. G. Parnell, 567 Hamilton St., Vancouver, B. C.,
Tait Pipe & Foundry Co., Vancouver, B. C.,
Clark & Stuart Company, 550 Seymour St., Vancouver, B.C.,
E. N. Moyer Co., Ltd., Edmonton, Alta.

You should ask these firms to quote their price, f. o. b. point of delivery and at the same time give them full information as to the sizes of the double desks required. Please forward properly certified vouchers, in duplicate, covering the expenditure incurred, also a memo showing the names of the firms asked to quote and the prices quoted.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

[Handwritten signature]
The Honourable,
The Minister of Indian Affairs,
Ottawa, Canada.

Dear Sir,-

We recently had an enquiry from the Indian Agent at New Westminster, B.C. for School Desks for their Mission School.

On quoting them on our CROWN SCHOOL DESKS we were informed that on instructions from Ottawa they were obliged to purchase double seats.

We are anxious to be able to fill the order, but are unable to supply double seats, as we no longer make them: this type has long since gone out of use in this Province and practically all schools which were equipped with the double seats have discarded them for the more up to date and practical single desk and seat.

We therefore hope that you will reconsider your instructions and give us the opportunity of supplying your New Westminster Agent with our Crown School Desks, a reliable and practical desk; manufactured in B.C. and supplied for the past three years to the Provincial Government and practically all the City Schools in the Province.

We remain,

Yours truly,

[Handwritten signature: B.H. Harwood]

Ottawa, December 27, 1923.

Sir,

I have been directed to acknowledge receipt of your letter of the 20th instant, regarding the desks required for St. Mary's Mission Indian Residential School, Mission, B.C.

In reply I beg to say that we understand the type of desk at present in use in the school is the double desk, and as the desks now required are to provide extra seating accommodation and complete equipment, it is necessary that they be of the same type, in order to have uniformity in the classroom. We requested our Agent at New Westminster to obtain competitive prices for the 20 double desks required. In furnishing a new school or a new classroom, we supply single desks, but where equipment of this nature is required for replacement purposes or to provide extra seating in a school where double desks are in use, it is necessary that desks of this type be obtained. Your firm will be given an opportunity to quote on our requirements for desks in British Columbia.

Your obedient servant,

J. D. McLean,
Asst. Deputy and Secretary.

Dear Sir:-

We have to thank you for your letter of 27th. ultimo, regarding the desks required for St. Mary's Mission Indian Residential School, Mission, B.C.

We note that you intend to refit this special class-room with double desks, and are sorry we are not able to offer you same. We are afraid they will have to be imported from the East, unless they can be picked up second-hand here, as they are not manufactured out here.

Should your Agent at Westminster find difficulty in securing these, and must have the single desks, we will be delighted indeed to supply his requirements.

Yours truly,

J. F. Tail

Mr. A.G. Orr, R.N.I.C.
Chief Architect of the Indian Dpt.
Ottawa.

MAR 11 1924

Dear Mr. Orr,

I am taking the liberty of sending you receipted invoices in connection with the Laundry of St. Mary's Indian School, at Mission, B.C.

You remember that at the time of your visit we were installing these machineries, boiler, washer and extractor. They have been in operation since last November and have proved very satisfactory. In fact our power (water power) runs simultaneously one washer and the extractor (26"). I wish to install a second washer exactly like the first, and thus keep one washer and the extractor running the whole morning of "our wash-day". I wish to install also small cannery for fruit and vegetables. But I have spent already over \$3,800.00 in improvements this year, and have received from the Dpt. only a little over \$1,400.00. Will you be kind enough to get these invoices approved and the money which they represent refunded.

At the time of your visit you suggested this way to me and gave me assurance of success. Hence my appeal to you and my boldness. The old fashion in operation here for years was a back breaking affair, and these improvements in this Dpt. of the school were very much needed. I can assure you too that they are greatly appreciated by all.

Thanking you in anticipation, and with kind wishes, I remain, dear Mr. Orr,

Yours sincerely

The on
\$837.15 is

Approved
del
Memorandum:

Mr. Scott.

When I visited St. Mary's Mission Indian School last fall the Reverend Principal pointed out to me the improvements which he had made to the laundry building and equipment. Father Duplanil has spent considerable money in remodelling the laundry and installing proper equipment. He asked me if the Department would give him some assistance in this matter and I advised him that if he would forward the accounts for mechanical equipment I would submit them to you for consideration.

He has today forwarded vouchers covering the cost of a steam boiler, a washer and an extractor, amounting to \$837.15. This is only a portion of the total cost to the Principal of the laundry and equipment, and I would recommend that the amount of these accounts be refunded to the Reverend Principal in the way of assistance to him in the work which he has carried out.

Mr. Ferrier states that funds are available at the present time to cover this amount.

1924

Dear Sir—

As you are aware an epidemic of diphtheria has broken out in St Mary's School. Mission.

Last March we had smallpox in the school and seriously felt the necessity of an isolation hospital. Just at the time there happened to be for sale, on our property, two buildings, two houses in fact which were offered to us for the nominal sum of \$45.00. We decided to purchase them for some future emergency. It is well we did so for at this moment they are serving the purpose of an isolation hospital for our little diphtheria patients.

Besides furnishing the buildings we wish also to install electric light and a telephone, so that the trained nurse in charge may be able to communicate with the school or the doctor at any hour of the day or night.

IN YOUR REPLY REFER TO

No. 1-8 A.

ALSO

TO DATE OF THIS LETTER

Sir,—

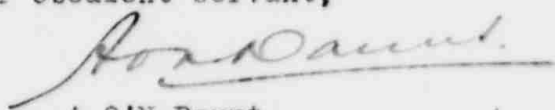

I have the honour to forward you herewith, a letter which I have received from the Rev. Father Welch, and which is self-explanatory.

There are at the moment, 107 Grant earning pupils in St Mary's School, and in addition, the Fathers invariably carry a number without recompense.

In an institution of this size, outbreaks calling for an isolation hospital, have always to be reckoned with, and I would most strongly recommend that any assistance possible be given the Fathers in meeting the cost of these very necessary buildings.

There are at present seven cases of Diphtheria being cared for in these buildings, and if they were not available, the cost to the Department of Public isolation, care, and treatment would probably be in excess of the amount now asked by the Fathers.

I have the honour to be,
Sir,
Your obedient servant,

A.O.N. Daunt,
Indian Agent.

Ottawa, October 20, 1924.

Dear Mr. Daunt:

I have your letter of the 7th instant, enclosing a communication from Rev. Father Welch, in which he requests the Department to reimburse the St. Mary's Indian Residential School for the expense incurred by the provision of two buildings for hospital purposes. I should be pleased if you would prepare a voucher in duplicate, in favour of the Rev. Principal, and attach the receipts secured at the time of the purchase of the buildings. You should place on the voucher a certificate, indicating the valuation you place on the buildings in question. Favourable consideration will then be given. Inform the Rev. Father Welch that the cost of installing electric light and telephone will have to be met by the school management.

Yours very truly,

Duncan C. Scott

Deputy Superintendent General.

DETAIL

AMOUNT

Dec. 18th- I certify that I have examined the buildings
erred to in this voucher and estimate the
lumber contained in them, without taking into
consideration labour and equipment to cost in
the neighborhood of \$1,350.00. This lumber is
practically new, so the price now asked in
reimbursement is a fair and just one and well
below the actual value of the material. Receipts
to the value of \$757.73 are attached hereto in
support of the claim for \$650.00 reimbursement.

TO DATE OF THIS LETTER

Approved
sch.
Sir,—

With reference to the letter of the Deputy Superintendent General, File No. 153-1-5 of October 20th, I beg to forward you herewith Agency Voucher No. 604 for \$650.00, representing an allowance made by the Department to the Principal of St. Mary's Mission Indian Boarding School, in respect to a provision of two buildings used as an isolation hospital during an outbreak of small-pox and diphtheria at the School.

Receipted accounts to the amount of \$757.73 are attached hereto, and show the expenditure incurred by the School in this connection, though they only asked for \$650.00 reimbursement. Among those the actual price paid for the buildings was \$440.00, the balance representing the necessary equipment.

I have examined these two buildings and estimate that the lumber used in their construction would have cost about \$1,350.00 without labour. One of the buildings is very well finished indeed and itself is worth the sum proposed as reimbursement for the whole. The other building is not so weather proof, but it is good lumber, which can easily be improved to suit any conditions. Altogether the sum of \$650.00 represents but a fraction of the value of the two buildings and equipment placed therein.

I would therefore recommend that reimbursement to the amount of \$650.00 be made to the School, as indicated in the correspondence above referred to.

Your obedient servant,

A.C.N. Daunt
A.C.N. Daunt.

Sir:

I have your No. 1-8-A of the 18th ultimo and in reply I have to inform you that the Department is directing a cheque for \$650 to the Rev. Principal of the St. Mary's Mission Indian Residential School. This payment is in respect to the provision of two buildings, used as hospital at the institution. I have noted that you estimate the value of the materials used in construction alone as \$1350. Please inform the Rev. Principal and the Very Rev. Father Welch that this payment is being made.

Your obedient servant,

St. Mary's Mission Indian School

Mission City, B.C., 192

H. C. M. Smith Esq.

Indian Agent,

New Westminster, B.C.

Dear Mr. Smith,

A few days ago I received a circular from the Dept. of Indian Affairs. The regulations it contains will state that orphans and children of destitute parents must be kept in school during the summer holiday. I shall have to keep a few more than in the past. I shall have to take these children to the beach for at least ten days. The reason is obvious; children who have to stay in the same locality, in the same surroundings for years, do get "fed up" with the locality, the surroundings and the school. Their health then suffers. Will you be kind enough to bring this matter before the Dept. and recommend that two tents be bought for the use of the St. Mary's school, one for the boys and one for the girls. These tents should be large enough to accommodate twelve children or more.

Yours sincerely

John S. S. S.

SIR:-

With reference to your Circular No 150-37 of May the 20th addressed to Church Authorities, Principals and Department Representatives.

I beg to forward you herewith a communication received from the Principal of St. Mary's Mission Residential School, and which is self explanatory.

I would strongly recommend that the Tents requested by the Principal be provided, as it is very much in the interests of these children, who do not go home for the holidays, to have a change from the school surroundings in the same manner as the pupils of Coqualeetza Institute, who are yearly taken to Ocean Park Summer Resort by the Reverend Principal.

Your obedient servant,

Sir:

I have your letter of the 10th instant, enclosing a communication from the Principal of the St. Mary's Mission Indian Residential School in which he requests that 2 tents be supplied in order that he can take those pupils who are orphans and the children of destitute parents, and, consequently have to be kept in the school during the summer holidays, to the beach for a change from the school surroundings.

In reply I beg to say that, before consideration can be given to authorizing this expenditure, it will be necessary for you to state the approximate cost involved in the supplying of these tents. We note that the Principal requests that each tent be large enough to accommodate at least 12 children. As soon as full information as to the cost is received, consideration will be given to authorizing the purchase of these tents.

Your obedient servant,

J. D. McLEAN

A black and white photograph of a building facade, likely a school or institutional building. The building features a gabled roof with two dormer windows. The main facade has several tall, narrow windows, some with decorative pediments. On the right side, there is a prominent external staircase structure with a wooden or metal frame. The image is heavily degraded with noise and artifacts, including a large white rectangular mark in the lower center and several dark circular spots. Faint text is visible on the right side, including "Solid" and "Density".

Sir.
Enclosed please find Blue Print showing our proposal for two sets of Metal Fire Escapes for St. Mary's Indian School, Boys and Girls quarters, at Mission, B.C.

We have examined the location carefully, and believe the locations shown, to be the best.

We propose to supply and install, the two sets of Escapes as shown- Painted one shop coat of Red Oxide and touched up after erection, no further painting being necessary.

We would be as careful as possible, but, the owner would require to make good any necessary cutting to inside of walls. This would not be extensive.

For the sum of One Thousand and Sixty-two dollars, (\$1062.00) for the two Fire Escapes.

Yours truly,

WESTMINSTER IRONWORKS LTD.

St. Mary's Residential School

Page 2.

Mission City, B. C..

for the last ten years. The repair man tells me that it is useless to try to repair it. It is highly dangerous for the fire can be seen through it in many places, such as around the oven doors and the smoke box, etc. I could replace for a couple of hundred dollars or thereabouts.

Two other items of a somewhat different nature, should, I feel, be brought to your attention. The pipe line which supplies water and light to the school is giving out. It has held long beyond the guaranteed time, but now the wire with the pipe is wound, is badly rusted through, and the pressure is continually bursting the pipe. It consists of about a mile of six inch wooden pipe.

The laundry building is decayed and delapidated beyond repair and leans so much from the perpendicular as to be dangerous. A fall of heavy snow on the roof or a strong wind might bring it down. Yet it has to be occupied one day a week to wash the clothes of the school and another day to wash the Indian children.

Mr. Daunt has made me acquainted with some of the financial difficulties of the present time, yet it is with confidence that I appeal to you, especially for the fire escapes and range, and, in anticipation, thank you.

Respectfully Yours,

A. J. Barney.

Mission City, B. C., Aug. 13. 1926.

Mr. Duncan C. Scott,
Deputy Superintendent General of Indian Affairs,
Ottawa, Ont.

Dear Sir:

Permit me to lay before you a situation which, I feel, calls for immediate attention. Both the boys' and the girls' buildings here are without fire escapes of any kind. The buildings are of wood and of three stories and the children sleep on the top floors. If a fire started during the night and got as well under way before being discovered as fires often do, it is doubtful if one of the fifty odd girls would get out alive and the boys' chances are but little better.

In the case of the girls' building, there is one stairs and it lands in a hall situated near the centre of the building and having no door opening to the outside. The houses are old, dusty, dry and veritable tinder boxes: the electric wiring is of the old-fashioned kind with naked wires; during cold periods in winter, stoves are stoked to full capacity in various rooms; and added to all this, is the everpresent danger of the children setting the house afire purposely. Therefore, the danger of fire occurring is about as great as could be found, while the danger to life in case of fire, is, if anything, greater still. It would be a case of fifty children on a third floor with sheer walls all around and the only stairs leading down into the heart of the burning building.

There is another smaller matter, for which I also crave your indulgence. The kitchen range used in the boys' building is very old and thoroughly burned out. It is the one on which most of the cooking of the school is done. The buying of a new one has been considered periodically

New Westminster, B.C.

September 15th, 1926. *MM*

IN YOUR REPLY REFER TO
No. **1-8-A.**
ALSO
TO DATE OF THIS LETTER

[Signature]
Sir,

I beg to forward you herewith a communication addressed to yourself, received by me under date of August 13th from the Rev. Principal of St. Mary's Mission Residential School, in which he requests Departmental assistance for the erection of fire escapes, the installation of a new pipe line, and the erection of a new laundry building.

This letter was held over while we investigated conditions thoroughly, and I enclose Blue Print and estimate received from the Westminster Iron Works Limited, calling for the sum of \$1,062.00 in connection with the fire escapes.

*Fire escapes
\$1062
\$200
See feed
RMB
huffe
line!*

I personally consider that the School should have some system of fire escapes, but in view of the fact that the buildings are old, and that some time in the near future it will become necessary to replace them, I do not feel that it would be good policy to spend so much money. I consider, however, that wooden outside structures might well be erected upon both the girls' and boys' buildings, and that the Principal's request would be reasonable to the extent of perhaps a total of \$200.00.

With regards to the pipe line, this is largely a matter which should be covered by the probable date of the erection of a new School at Mission. If it is proposed to build one in the immediate future, the matter might as well be allowed to wait. On the other hand there is no doubt that the pipe line is in bad shape, and that as the water supply of any future school must of necessity be derived from the present source, a pipe line would not be an absolute waste, as the greater part of it would be utilized for the new buildings. I appreciate, of course, that the cost in this latter case would be met from the building appropriation instead of from current revenue, as would be necessary now.

*New laundry
RMB*

The laundry building while old and settled out of shape, is in no immediate danger, and I would recommend that no change be made while the existing buildings remain in use.

I have the honour to be,
Sir,
Your obedient servant,

Encls.

Duncan C. Scott, Esq.,
Deputy Superintendent General
of Indian Affairs, Ottawa, Ont.

Ottawa, October 1, 1926.

Sir:

I have your 1-8-A of the 15th ultimo, enclosing a communication from the Rev. Principal of the St. Mary's Indian Residential School. I note that some provision for fire escapes should be made: that the water supply pipe line needs replacement and that the laundry building is in very poor condition. The Deputy Superintendent General has directed that favourable consideration be given to the needs of this school and, in the near future, you will be advised if anything can be allowed at the present time. I am pleased to authorize you to purchase, after securing competitive prices, one Chef Hotel Range for the kitchen, with three ovens and two fireboxes, similar to McClary's K. E. 5. You should secure prices on this equipment from the wholesalers in Vancouver. Please inform the Rev. Principal.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

Sir:

With further reference to your 1-8-A of the 15th ultimo, concerning improvements for the St. Mary's Indian Residential School, I am pleased to authorize you to arrange for the erection of wooden fire escapes at both the boys' and girls' buildings. I have noted your estimate of \$200 in this connection. You may engage one or two expert carpenters for this purpose and have them assisted by the staff and the older boys of the school. Proper time sheets in duplicate should be kept, showing the hours of work and the receipts of the men. The materials necessary should be purchased by you, after securing competitive prices if possible. If an accountable cheque for labour is desired, please let me know.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

With reference to your letter No. 153-1-5 dated the 1st of October last, I beg to forward you herewith Voucher No. 497 for the sum of \$278.35 in favour of Rev. H.J. Barney, Principal of St. Mary's Mission Residential School, and representing the purchase and installation of a "McClarys Hotel Range", as indicated by you.

By the time I received your authority to make this purchase the old Range had gone to pieces, and the Principal had been obliged to buy a new one, hence the account being submitted in the form of a refund to the School, rather than as a direct purchase from the Firm.

I would, therefore, recommend the account for payment, as the School looked into the matter of competitive prices before making their own purchase.

St. Mary's Residential School

Mission City, B. C.

Jan. 25. 1927.

Mr. Duncan C. Scott,
Deputy Superintendent General of Indian Affairs,
Ottawa, Ont.

Dear Sir:

The pipe line, which supplies water, light and power to this school, is badly in need of being renewed. Father Welch spoke with you on the matter, I understand, when he was in Ottawa in December last. He asked me to furnish you with some idea of the probable cost of the replacement. The following is what I have found out on the matter.

There is required, 6000 feet, of 8 inch, wooden pipe, for a head of 275 ft. The old pipe is 6 inch, but we lose much power in friction, and, in consequence, our lights are very poor. Iron pipe has a very uncertain life in this country, and wood pipe is preferable, especially the quality now made, and having the new couplings.

A new and straighter line needs to be surveyed for the pipe and the pipe and the connections installed. A new dam is required at the intake. Also, a new dynamo. The original dynamo is in very shaky condition, and the electrician of Mission City who repairs it for us says it cannot be further repaired and may go to pieces any moment. It is of seven horse power, but the new one should be of nine.

I have asked the manager of the Mission Public Service Co., which supplies water to Mission City, to have his men go over the situation, and give me his estimate of the probable cost. His answer is "About nine thousand dollars." This is meant to cover everything.

Trusting this is the information required, I remain,

Respectfully Yours,

A. J. Barney.

February 3rd, 1927.

File No. 1-8-A.

SIR:-

With reference to your letter No. 153-1-5 of October 1st, I beg to forward you herewith a communication received by me, and which I notice is addressed to the Deputy Superintendent General, giving an idea of the requirements in connection with the installation of renewals to the water pipe line at St. Mary's Mission Residential School.

The Dynamo which supplies the Institution with electric light is also in a very shaky condition and requires replacement.

There is no doubt that the pipe line is in very bad condition and also the dynamo is quite unfit for the work it is to perform, the cost of replacements however, are high and I think a great deal depends upon whether it is the intention of the Department to build a new School in the near future.

If the present Institution is to be maintained, I would recommend that the Dominion Water Power Branch be asked to look into the matter, and submit a report as to the cost of the necessary replacements, which will certainly have to be made if the School is to be retained on present lines.

Your obedient servant,

Sir,-

gfg

The Department is advised by Indian Agent Daunt, of New Westminster, B. C. that the water supply pipe and the electric lighting plant at the St. Mary's Mission Boarding School at Mission City, B. C. are in a dilapidated condition. The estimate furnished this Department for the cost of repairs to both systems amounts to \$9,000.00. Before this matter can be taken into consideration, I would like to know whether one of your local engineers can undertake to furnish me with a detailed report and estimate of the work required to put the above mentioned systems in a state of repair.

Your obedient servant,

Sir:

I have to acknowledge receipt of the vouchers which you submitted covering the cost of the spraying material supplied to St. Mary's Mission and Coqualeetza Residential Schools by Mr. W. B. Anderson, Superintendent of Indian Orchards. I am returning this account, as it is considered that this type of expenditure should be paid by the schools ~~from~~ their per capita grant or other earnings. I understand that Mr. Anderson had authority to purchase for Indian orchards, but this did not include the residential schools. You should correspond with him, with a view to ascertaining whether he promised that the Department would pay these accounts. If not, they should be sent to the schools for payment. Please advise him that Indian residential schools are responsible for purchases of this kind.

Your obedient servant,

J. D. McLEAN

New Westminster B.C.

Dear Mr Daunt:-

Replying to your letter of 7th inst, re school supplies, I must tell you that in a letter dated Feb 15th ult, sent by me with requisitions and tenders for Horticultural supplies to the Indian Department, the following following items are requisitioned.--St Mary's Mission, 100 lbs Bordeaux, 50 ft 1/2 in hose for spray pump. Coqueleetza Inst, Sardis, 12 plum 12 pear, 30 apple. Lime-Sulph spray was applied for after, and this was filled under the following item "Emergency - 2x50 lbs Lime-Sulph" also on the requisition.

In a letter from the Department to me under date of Feb 22nd, No 43-1 A, there appears the following--"I am in receipt of your letter of the 15th instant with which you forwarded tenders for fruit trees, sprays and other garden supplies required by Indians of British Columbia, and in reply I may say that the lowest tender in each case should be accepted; namely:- the tender of the British Columbia Nurseries Company Limited, ---- "for fruit trees. The tender of the Brackman-Ker Milling Company Limited, ---- "for sprays, and also the tender of the last mentioned firm---- "for hose" ----.

(Signed) F. H. Paget

J. D. McLean

Assistant Deputy and Secretary.

This I think will cover all questions as to Departmental sanction for the School purchases. I may however, call your attention to the fact that similar purchases have been ratified by the Department ever since I have held office. If it is the intention to discontinue the practice, I would much like to be so informed at an early date.

Yours very truly

Superintendent of Indian Orchards

SIR:-

In reply to your letter No. 153-1-5 of April 1st, and having reference to Agency Voucher No. 624 in favour of the Brackman-Ker Milling Company Limited, submitted by Mr. W.B. Anderson, Supervisor of Indian Orchards, on account of supplies furnished St. Mary's Mission Residential School and the Coqualeetza Industrial Institute.

I beg to forward you herewith reply received by me from Mr. Anderson, and which I presume covers the case. The Voucher, in question, is also returned herewith.

Your obedient servant,

A.O'N. Daunt.
Indian Agent.

The Assistant Deputy & Secretary,
Department of Indian Affairs,

Ottawa, April 23rd, 1927.

Sir:

I have your letter of the 11th instant, regarding the accounts covering the cost of spraying materials supplied to St. Mary's Mission and Coqualeetza Indian Residential Schools by Mr. W. B. Anderson, Supervisor of Indian Orchards, and enclosing a communication from him regarding the purchase.

In reply I beg to say that the Department has decided to pay these accounts in this instance, but, in future, it is expected that the schools will be responsible, from their per capita grant or other receipts, for the payment of any materials required for spraying and the cost of the work. In the case where fruit trees are required to start an orchard at a school, the Department might, after full particulars have been received regarding requirements, approve of an expenditure towards the payment of same. Please inform Mr. Anderson accordingly.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

DOMINION WATER POWER AND RECLAMATION SERVICE

VANCOUVER, B.C.

May 10, 1927.

Sir:- Re - St. Mary's Mission School
Water & Light System.

In compliance with your instructions I made an inspection and survey of the water and light plant of St. Mary's Mission School at Mission City, B.C. The following is a report on the condition of the existing plant and suggested replacements and improvements.

ST. MARY'S MISSION SCHOOL-

This school is situated on the north bank of the Fraser river about one mile east of Mission City, B.C. It is a boarding school for Indian children, owned and operated by the Order of Mary Immaculate. About one hundred and sixty children are usually in attendance.

A farm is operated in connection with the school, the property comprising about 480 acres of which about 160 acres are under cultivation. The school buildings are of frame construction and were built quite a number of years ago.

PRESENT WATER SYSTEM-

The accompanying plan shows the layout of the present system. A small concrete dam about five feet in height forms a reservoir of about 10,000 gallons capacity in the creek bed. A six inch pipe line 4,300 feet long conveys

Indian Affairs (RG 10 Volume 6470, file 890-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

water to the school. The pipe is tapped at various points to supply the different school buildings. The present pipe is in very bad condition and practically irreparable. To the fact that this pipe was poorly laid and in many places without cover may be attributed its comparatively short lifetime.

LIGHTING PLANT-

An extension of the pipe line for 1,000 feet provides an additional head sufficient to develop power for lighting purposes. A 24" Pelton type wheel belt connected to a 7 K.W. generator forms the electric lighting plant.

The Pelton, although in a bad state of repair, furnishes sufficient power to operate the generator but this machine probably does not produce in excess of 4 K.W. due to a speed below its rating and to the fact that the commutator is practically worn out. No governor is used, the water being turned on at night and allowed to run until the pipe empties.

The transmission line also requires replacement. The wires being bare of insulation and always in danger of short circuit.

OTHER SERVICES-

In addition to the services before mentioned several other operations are performed. A tap from the main line leads to the laundry where a Pelton operates the laundry machinery. Another tap leads to the barn and woodyard where a home-

made Pelton type wheel drives the threshing machine and wood saw.

Two inside hydrants and four outside are intended to provide fire protection. Two of the latter are in such close proximity to the school buildings as to be almost useless and in fact a menace to the supply in the event of a fire. Only two hundred feet of hose of small size, and now almost useless, is available.

It may be readily understood that with all the tasks required of the very small water supply there are many times when a shortage becomes acute. For none of the services is there ever quite enough power developed to adequately fill the necessities.

WATER SUPPLY-

The water supply for the school is derived from Durien or Mission Creek. It is carried by pipe line to the school site, a distance of approximately $\frac{3}{4}$ of a mile. This water supply also furnishes power for lighting and other power purposes. Durien creek rises north of the town of Mission in a country that is unsettled and which will probably remain so for many years, the country being fairly heavily timbered and with very poor soil.

The present supply has been in use about fifteen years. The school authorities are well satisfied with the quality of the water and I am informed that no sickness has ever been attributed to it.

Indian Affairs (RG 10 Volume 6470, file 890-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

FOR COPY

A license No. 3182 for 1 cu.ft. per second is held by the school and is of a priority as from 23rd July, 1873. No other record exists on this creek.

The flow of the creek varies from about 3 c.f.s. in winter to 0.75 c.f.s. in midsummer. At the time of my visit, the first week in April, the flow over the dam spillway was 0.9 c.f.s. in addition to which there was a very great loss along the pipe line, possibly as much as 0.5 c.f.s.

POWER AVAILABLE-

The minimum flow of Durien creek may be taken as 0.75 c.f.s.; this flow, however, does not determine the useful power. The power needs in midsummer when the flow is lowest are very small, while in winter they are about twice that required in summer. It may safely be estimated on the past fifteen years performance of the present plant that the useful flow is about one c.f.s. This should develop on a Pelton wheel with a useful head of 230 feet, about 15 H.P. considering a generating efficiency of 85%, about 9 K.W. would be available for use on the lighting circuit at 125 volts.

POWER REQUIREMENTS-

There are about 225 lamps at present in use of an average of 40 watts each which, under the present system of operating the lighting plant, would require a plant of about 10 K.W. capacity for the reason that there is no means available of reducing the output of the generator. Normally the

requirements should not exceed 60% of the full load. It is safe to assume that the 9 K.W. available would be sufficient for all lighting requirements.

This amount of power would be ample to operate all other services combined, during the day time. The laundry needs occur only once a week and at no time when light is required. The development of 9 K.W. would carry one half the lighting load and operate either the wood-cutting plant or the laundry at the same time, all that should be considered necessary.

The lighting needs of a future new school would be considerably less than present requirements as many of the buildings now in use would be dispensed with.

PROPOSED PLANT RENEWAL-

If properly managed, the present water supply is adequate to fill the needs of the school for domestic purposes, fire protection, and power, for many years.

The whole system requires replacement, the material being in a state of decay and the equipment practically worn out.

The plan suggested for replacement follows, with few exceptions, the general idea of the present system. An effort has been made to conserve as much as possible the small, though adequate water supply.

It is proposed to replace the present main from the intake to the school with a pipe of

a larger size making connection with the present service points as shown on the accompanying plan and profile. In the school area the pipe line is kept well back from the present buildings so that new buildings will not require a removal of location. The pipe line is to be buried with a minimum of 2.5 feet of cover.

Four hydrants are provided for fire protection service located at points to best serve the present school buildings as well as any future structures.

At the intake it is proposed to provide a reservoir of 30,000 gallons capacity. This is primarily for emergency use in case of fire when the electric lighting plant requires practically the whole flow of the stream.

ELECTRIC POWER PLANT-

It is proposed to extend the pipe line as at present to a point near the existing power house to obtain all available head. This extension would require approximately 600 feet of pipe.

The power plant would consist of an 18 inch Pelton type water wheel connected by a silent chain drive to a 9 K.W. generator; the water wheel to be controlled by a mechanical governor.

COST-

The total cost of the combined water system and power plant as suggested would be \$10,340. In addition there would be the cost of installing motors for operating Laundry and for other uses.

OTHER SERVICES-

It is proposed to replace with electric motors the present water driven services in order to conserve the water supply.

For the laundry a 5 H.P. motor is necessary which would be hooked into the present transmission line by a short branch.

For threshing and wood cutting purposes a 5 H.P. motor is also necessary; this would also be connected to the present transmission line by a short extension.

The cost of these installations would be \$700.00, including cost of power line extensions. This is somewhat less than replacing the present system with a similar one and providing new drains to carry away the tailings, which would amount to \$556.00 in the case of the threshing and wood cutting installation, and \$325.00 in the case of the laundry.

FIRE PROTECTION-

It is suggested that 700 feet of hose and a reel be provided for fire protection purposes to replace the present hose which is in poor shape. The cost of this would be \$660.00

SUMMARY OF COST-

The total cost of the installation as proposed would be \$11,700. A proportion of the cost of pipe line for water supply suggested is for the use of the power plant. A system for purely domestic use and fire protection could be installed for \$7,000; so that the actual investment for power and lighting is \$4,000.

The yearly cost of power and light, presuming a lifetime of 25 years for the plant would be \$360.00 (Interest and depreciation 9%) This is at a rate of approximately two cents per K.W. Hour as compared with seven cents per K.W. Hour quoted by the British Columbia Electric Company for the same service.

Attached hereto are summary of cost, bill of material, and plans of plant suggested as being the most suitable for the school.

Your obedient servant,

W. C. Warren

Sir,

Your file number: 153-1-5A.
Attention: Departmental Engineer.

Encl.

In further reference to your letter of February 12 last regarding the water supply and electric lighting plant at St. Mary's Mission School at Mission, B.C., I enclose herewith a report describing what is necessary to place the system in a satisfactory condition.

You will note that the report states that the present water supply system is in bad condition and will require almost complete renewal. The electric lighting plant also needs considerable replacement. The total cost estimated for replacing the water supply system and for providing electric light plant amounts to \$11,700, of which \$7,000. is for the water supply system only, including fire protection.

I shall be glad to have your further instructions with regard to this matter.

Your obedient servant,

J. T. Johnston,
Director.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

June 13, 1927.

Memorandum:

Mr. Chene

DR. SCOTT.

There is an item of \$7,000 in the Main Estimates for the provision of a suitable water supply system at the St. Mary's Indian Residential School, Mission, B. C. The Dominion Water Power Branch have the matter in hand and have estimated the cost of the activity at \$7,000, which includes fire protection. I wish to recommend that Mr. Chene give the necessary instructions to the Dominion Water Power.

It appears that \$4,700 is required for the provision of a suitable electric light plant at this institution. There are no funds to proceed with this at the present time, but I shall make a note for next year's Estimates. Before expending this amount of money on electric light plant, I believe we should seriously consider less expensive schemes, as the building is not destined to be used for very many years.

Russell Price

Supt. of Indian Education.

Sir,-

17-1

I wish to acknowledge receipt of your letter of the 6th instant, together with a report prepared by your branch on the replacement of the present water and electric lighting systems for the St. Mary's Indian Residential School at Mission, B. C. After giving the contents of this report due consideration, the Department will be grateful if you will arrange with one of your district engineers to undertake on behalf of this Department the construction of the water supply system only, which has been estimated to cost \$7,000.00. The work should be carried out in accordance with the above mentioned report, in the same manner as was done for similar projects last year. Whenever possible competitive prices for all materials and machinery should be obtained, and these should be of Canadian make. Quotations obtained should be submitted together with the accounts, certified to by the officer in charge of the work.

The question of erecting a suitable electric lighting plant for this Institution will be taken into consideration at a later date, when I shall further advise you with regard to this work.

Your obedient servant,

J. D. McLean

File No. 1-8-A.

New Westminster, B.C.
June 14th, 1927.

SIR:-

I beg to forward you herewith an estimate received from the Rev. Principal of St. Mary's Mission Residential School, regarding necessary repairs to the buildings.

With regard to the first item, the roofs are leaking badly and in wet weather a number of pails are required to catch the water which comes through, I would certainly recommend that this be attended to as soon as possible.

- (a) Building Repairs: Owing to the extreme age of the buildings, the steam heating, particularly in the girls' building proved inadequate to save the pipes from freezing, several were put out of commission, and while temporarily fixed it is absolutely necessary that the above be attended to as soon as possible.
- (b) Carpentry: A good deal of work in this connection is necessary to stop drafts, otherwise making the buildings more frost proof, and I would recommend that this be done.
- (c) Plastering, Kalsomining and Painting: This is necessary to repair damages caused by the weather last winter, where walls have been injured as well as damage by rain coming through the roofs.
- (d) Stoves: The steam heating being inadequate to properly take care of the girls' building, about seven stoves are necessary to keep it in a habitable condition during the winter months. During the cold weather, it is now impossible to keep the children at their work on account of the low temperature in the buildings. I would recommend that an appropriation be made to this end.

A great deal, of course, depends upon how soon the Department proposes to erect a new School. The buildings at St. Mary's Mission are in exceedingly poor shape, but if they have to do duty for some time to come, the above repairs are absolutely necessary.

The total amount estimated as vitally necessary to meet present requirements will come to about \$1,500.00.

Your obedient servant,

A.O.N. Daunt.
Indian Agent.

Sir:

I have your 1-8-A of the 14th instant, enclosing estimate of the Rev. Principal concerning repairs required at the St. Mary's Indian Residential School. You are authorized to expend \$100 in repairing the metal roofs of the boys' and girls' buildings. I regret that I cannot favourably consider the provision of supplementary heating units, because of the danger, unless I am assured that adequate arrangements can be made for fire prevention. You might let me have a detailed estimate as to the materials and labour required for the building, plumbing and decorating items. These are each estimated at \$200, but the Department requires a more careful estimate before intelligent consideration can be given.

Your obedient servant,

J. D. McLean

Sir,

Re: St. Mary's School at Mission, B.C.
Attention: Departmental Engineer.

I have received your letter of the 17th instant authorizing the replacement of the present water supply system for the St. Mary's industrial school at Mission, B.C., in accordance with the report which accompanied my letter of the 6th instant. A copy of your letter has been sent to Mr. Webb with instructions to call for tenders to be submitted to the Indian Department. It is noted that the replacement of the electric light system is reserved for further consideration.

Owing to the large amount of work at present on hand for the Indian Department it is possible that Mr. Webb may not be able to arrange for this work to be undertaken until later in the season.

Your obedient servant,

J. T. Johnston,
Director.

DOMINION WATER POWER AND RECLAMATION SERVICE

Vancouver, B.C.,
June 25, 1927.

Sir,

Re: St. Mary's Indian Reserve School,
Mission.

Acknowledgment is made of your letter of the 20th inst. wherein you quote a letter received from the Department of Indian Affairs under date of June 17th which authorizes the construction of water supply system for the above school at estimated cost of \$7000. It is noted from the letter of the Department of Indian Affairs that the work should be carried out in the same manner as was done for similar project last year. Whenever possible, competitive prices for all material and machinery should be obtained and this of Canadian make. Quotations obtained should be submitted together with the accounts certified to by the officer in charge of work.

The usual procedure in constructive work of this nature has been for this office to obtain competitive prices for equipment, and orders have been placed by me; then when submitting final report on constructed works, all quotations obtained are submitted together with the accounts duly certified.

It is noted from your letter of 20th inst. that you request tenders to be submitted to you for transmission to the Department of Indian Affairs and it seems to me that this procedure is not what is contemplated by the Department of Indian Affairs but that they wish all tenders to be submitted when final accounting for the constructed works is made. I trust I have made myself quite clear in this matter and to reiterate, it seems to me the Indian Department do not wish to have the tenders submitted to them before the works are undertaken but wish to have a copy of the tenders submitted with the final accounting of the project.

Will you kindly take this point up with the officials of the Department of Indian Affairs and advise me.

In the event of it being necessary to submit all tenders to Ottawa for consideration, there will undoubtedly be considerable delay in the carrying out of the proposed works.

Your obedient servant,

(Sgd.) C. E. Webb,
District Chief Engineer.

Sir,

Re: St. Mary's Indian School,
Mission, B.C.
Attention: Departmental Engineer.

In further reference to your letter of
June 17th authorizing the construction of the water supply
system for the St. Mary's Indian School at Mission, B.C.,
I enclose herewith copy of a letter received from Mr. Webb
regarding the tenders for this work and shall be obliged
if you will advise me what reply should be made to Mr.
Webb. The point on which he wishes to be instructed is
whether, after obtaining tenders, he is to place the
work in accordance with the tenders submitted or whether
he is to submit all tenders to the Indian Department,
and place the work in accordance with instructions received
from the department.

In order to avoid delay in carrying out
the construction I shall be glad if you will advise me
about this as soon as possible.

Your obedient servant,

J. T. Johnston,
Director.

OFFICE OF
INDIAN AGENT

File No. 1-8-A.

New Westminster, B.C.
July 14th, 1927.

SIR:-

In reply to your letter dated the 22nd ultimo, File No. 153-1-5, I beg to forward you herewith a detailed estimate in connection with the repairs required at St. Mary's Indian Residential School, amounting to \$838.50, with an additional sum of \$328.00 for the necessary stoves etc., for heating, making a total of \$1,166.50.

These repairs are absolutely necessary, and unless the Department intend to erect a new school in the near future, there is other work that should be carried out. The Laundry is beyond repair, as it is very old and has been repaired so often that nothing more can be done to it.

The Stoves, stove boards and galvanized protective stands to protect wood work, will be installed when the other repairs are being carried out, so I am sure that this will be satisfactory for fire prevention.

I would strongly recommend that the necessary authority to proceed with the work be wired to this office, as the School Authorities wish to have these repairs carried out when the children are away on their holidays, and as they leave on the 15th instant, it will give very little time.

Your obedient servant,

L.M. Dynes
L.M. Dynes.

Ottawa, July 25, 1927.

Sir:

I have your letter of the 14th instant, with reference to repairs at the St. Mary's Indian Residential School. In reply I have to confirm official night letter of today's date, as follows:-

"Reference your letter fourteenth instant, Department cannot agree to supply stoves. Will allow one hundred and fifty dollars for materials for calcimining, painting and repairs. Labour should be provided by school management. Plumber may be engaged to make most urgent repairs but his bill must not be over two hundred dollars."

In explanation, I wish to point out that the Department cannot favourably consider supplying supplementary heating units because of the danger from fire. Our funds are strictly limited this year and only the most urgent work can be authorized. The school management must provide as much labour as possible.

Your obedient servant,

A. F. MacKenzie over
A. F. MacKenzie,
Acting Asst. Deputy & Secretary.

OFFICE OF
INDIAN AGENT

File No. 1-8-A.

New Westminster, B.C.
July 26th, 1927.

SIR:-

With reference to your night letter of the 25th inst., received this morning authorizing only \$150.00 for material for kalsomining, painting and repairs to St. Mary's Mission Residential School, and refusing to agree to the installation of stoves.

I beg to point out that it is absolutely imperative that the heating system of this Institution be completely overhauled before the winter. The furnace is worn out and is not capable of furnishing the necessary heating. This is not an exaggeration, as I have been at the School, and personally seen conditions for myself during severe weather.

The buildings are the oldest in British Columbia, and the wind blows right through them, so that even with a thoroughly up to date furnace or heating system, great hardship is inflicted on both staff and pupils during cold weather, with practically no heating system, as at present, the situation is desperate, and I must most emphatically draw your attention to the urgent need of its entire reconditioning before the coming winter.

As a matter of fact this should have been attended to long ago, but the matter was allowed to drift, as we were all under the impression that the erection of a new School would have been undertaken ere now. As there is no apparent chance of this for some years, in view of proposed new Schools in other places, it becomes absolutely necessary to put St. Mary's Mission School in such a condition of repair that it can carry on in the meantime. The cost of a new furnace would be approximately \$2,000.00, and I recommended the purchase of stoves at a cost of \$328.00, as a cheap way of meeting the situation.

Your obedient servant,

A.O.W. Daunt.
Indian Agent.

Deputy & Secretary,
Department of Indian Affairs, Ottawa, Ont.

As this is so urgent, I shall be much obliged if you will write final instructions.
